

Annual Appraisal Assessment for JOHNSON, MICHAEL T

Year: 2025

Broadband Level:

III

Occupational Series:

2110 - Business Management and Technical Management Professional

Career Path:

Expected OCS:

62

Supervisor Level 1: BUCHANAN, PATRICIA G

Method of Communication: Tele-Conference

Supervisor Level 2: EBBENS, TIMOTHY P

Date Conducted: 01-26-2026

Contribution Planning:

Individual Objectives

Brief Job Description: As a Information Technology Specialist in Systems Administration, I support the 21st Civil Engineer Squadron by ensuring mission-critical infrastructure and services remain operational across multiple installations.

Job Achievement and/or Innovation:

Objective 1: Plan and execute Systems Administration projects ensuring compliance with applicable standards.

Objective 2: Develop and implement process improvements for Systems Administration operations.

Communication and/or Teamwork:

Objective 1: Deliver briefings to 21 CES leadership on Systems Administration status and initiatives.

Objective 2: Collaborate with cross-functional teams to integrate Systems Administration requirements.

Mission Support:

Objective 1: Align Systems Administration activities with organizational mission objectives.

Objective 2: Manage resources and budgets to support Systems Administration operations.

Overall Employee's Self-Assessment:

Job Achievement and/or Innovation

Job Achievement Objective 1:

What: Managed installation of upgraded fire alarm systems across three dormitory complexes, coordinating with contractors and base operations.

Result: Completed all installations ahead of schedule with zero safety incidents, achieving full compliance with UFC standards.

Impact: Strengthened installation safety and infrastructure reliability, directly supporting SBD 1's mission to deliver world-class weapon-system infrastructure.

Job Achievement Objective 2:

What: Developed and implemented a preventive maintenance schedule for 45 HVAC units across the installation.

Result: Reduced emergency maintenance calls by 30% and extended equipment lifespan by an estimated 3 years.

Impact: Enhanced operational readiness of critical facilities, enabling uninterrupted support to Space Force and Joint Partner operations.

Job Achievement Objective 3:

What: Led environmental compliance inspections at 12 facilities, identifying and documenting regulatory gaps.

Result: Identified 15 regulatory gaps and developed corrective action plans, achieving 100% closure within 60 days.

Impact: Ensured regulatory compliance that protects installation operations and supports Combat Engineers' delivery of sustainable installations.

Communication and/or Teamwork

Communication Objective 1:

What: Oversaw \$4.2 million in construction projects, ensuring on-time and on-budget completion.
Result: Delivered all projects within budget and ahead of schedule, with no quality deficiencies.
Impact: Delivered infrastructure improvements that directly enable Combat Engineers to power global superiority.

Communication Objective 2:

What: Implemented energy conservation measures across 20 facilities, reducing consumption by 15%.
Result: Reduced energy costs by \$180,000 annually while maintaining operational requirements.
Impact: Reduced operational costs while maintaining mission capability, supporting efficient resource utilization across SBD 1.

Communication Objective 3:

What: Coordinated with AFCEC on a \$8 million facility modernization project.
Result: Secured project approval and funding, advancing to the 35% design milestone.
Impact: Advanced facility modernization that strengthens weapon-system infrastructure for multi-domain operations.

Mission Support

Mission Support Objective 1:

What: Designed and implemented an automated work order tracking system for the CE squadron.
Result: Reduced work order processing time by 40% and improved tracking accuracy to 98%.
Impact: Improved squadron operational efficiency, enabling faster response to mission requirements and supporting professional development of personnel.

Mission Support Objective 2:

What: Conducted structural assessments of 8 mission-critical facilities following severe weather events.
Result: Identified structural concerns in 2 facilities and initiated repairs before mission impact occurred.
Impact: Preserved mission-critical facility integrity, ensuring uninterrupted support to homeland defense operations.

Mission Support Objective 3:

What: Managed the asbestos abatement program across 15 buildings, ensuring regulatory compliance.
Result: Achieved full regulatory compliance across all 15 buildings with zero findings during EPA inspection.
Impact: Protected personnel health and installation environmental compliance, supporting sustainable installations for current and future missions.

Overall Supervisor Assessment:

	Categorical Score 3L	Numeric Score 65	PAQL 5
Job Achievement and/or Innovation			
I concur with the employee's self-assessment. Mr./Ms. JOHNSON has demonstrated strong performance in this factor area. Their contributions directly supported the squadron's mission objectives and aligned with SBD 1 priorities. Contributions were well-documented and clearly tied to mission objectives. Performance in this area meets expectations for the assigned broadband level and supports the recommended categorical score.			
Communication and/or Teamwork	3L	64	5
I concur with the employee's self-assessment. Mr./Ms. JOHNSON has demonstrated strong performance in this factor area. Their contributions directly supported the squadron's mission objectives and aligned with SBD 1 priorities. Communication and teamwork efforts effectively supported cross-functional coordination. Performance in this area meets expectations for the assigned broadband level and supports the recommended categorical score.			
Mission Support	3L	65	5
I concur with the employee's self-assessment. Mr./Ms. JOHNSON has demonstrated strong performance in this factor area. Their			

contributions directly supported the squadron's mission objectives and aligned with SBD 1 priorities. Mission support activities were consistent and aligned with organizational priorities. Performance in this area meets expectations for the assigned broadband level and supports the recommended categorical score.

Annual Appraisal Assessment for WILLIAMS, SARAH K

Year: 2025

Broadband Level:

III

Occupational Series:

0810 - Business Management and Technical Management Professional

Career Path:

Expected OCS:

68

Supervisor Level 1: MEYER, JOHN R

Method of Communication: Tele-Conference

Supervisor Level 2: FOSTER, WILLIAM K

Date Conducted: 01-26-2026

Contribution Planning:

Individual Objectives

Brief Job Description: As a Civil Engineer in facility design and construction oversight, I support the 21st Civil Engineer Squadron by ensuring mission-critical infrastructure and services remain operational across multiple installations.

Job Achievement and/or Innovation:

Objective 1: Plan and execute facility design and construction oversight projects ensuring compliance with applicable standards.

Objective 2: Develop and implement process improvements for facility design and construction oversight operations.

Communication and/or Teamwork:

Objective 1: Deliver briefings to 21 CES leadership on facility design and construction oversight status and initiatives.

Objective 2: Collaborate with cross-functional teams to integrate facility design and construction oversight requirements.

Mission Support:

Objective 1: Align facility design and construction oversight activities with organizational mission objectives.

Objective 2: Manage resources and budgets to support facility design and construction oversight operations.

Overall Employee's Self-Assessment:

Job Achievement and/or Innovation

Job Achievement Objective 1:

What: Coordinated emergency response exercises with local fire departments, involving 200 personnel.

Result: Successfully executed exercises with a 95% participation rate and zero safety incidents.

Impact: Improved base-wide emergency preparedness, directly supporting SBD 1's priority of base support to mission partners, Guardians, and families.

Job Achievement Objective 2:

What: Authored a \$2.5 million project proposal for runway repair, including cost estimates and timelines.

Result: Secured approval from the Group Commander, advancing the project to design phase.

Impact: Advanced infrastructure modernization efforts that enable Space Force to execute global multi-domain operations.

Job Achievement Objective 3:

What: Designed and implemented an automated work order tracking system for the CE squadron.

Result: Reduced work order processing time by 40% and improved tracking accuracy to 98%.

Impact: Improved squadron operational efficiency, enabling faster response to mission requirements and supporting professional development of personnel.

Communication and/or Teamwork

Communication Objective 1:

What: Managed real property records for 150 facilities, ensuring accuracy and compliance.

Result: Resolved 20 discrepancies in real property records, improving data accuracy to 99%.

Impact: Ensured accurate property records that support informed infrastructure investment decisions across the installation.

Communication Objective 2:

What: Developed disaster recovery procedures for critical infrastructure systems.

Result: Published procedures and conducted tabletop exercises, validating response capabilities.

Impact: Strengthened installation resilience against natural and man-made threats, supporting continuity of space operations.

Communication Objective 3:

What: Led the quality assurance program for 10 active construction contracts.

Result: Identified and corrected 8 quality deficiencies before they impacted project timelines.

Impact: Maintained construction quality standards that ensure long-term infrastructure reliability for mission operations.

Mission Support

Mission Support Objective 1:

What: Led a team of 6 engineers in designing utility infrastructure for a new operations facility.

Result: Delivered the utility design 2 weeks ahead of schedule, enabling construction to begin on time.

Impact: Enabled timely construction of facilities essential to expanding Space Force operational capacity.

Mission Support Objective 2:

What: Developed training materials for 30 squadron personnel on updated safety protocols.

Result: Achieved 100% completion rate for safety training with a 95% knowledge assessment pass rate.

Impact: Enhanced workforce readiness and safety awareness, directly supporting SBD 1's priority of developing professional and resilient personnel.

Mission Support Objective 3:

What: Oversaw \$4.2 million in construction projects, ensuring on-time and on-budget completion.

Result: Delivered all projects within budget and ahead of schedule, with no quality deficiencies.

Impact: Delivered infrastructure improvements that directly enable Combat Engineers to power global superiority.

Overall Supervisor Assessment:

	Categorical Score 3L	Numeric Score 65	PAQL
Job Achievement and/or Innovation			5
I agree with the annual assessment, and the employee is exceeding expected contributions. Mr./Ms. WILLIAMS has demonstrated strong performance in this factor area. Their contributions directly supported the squadron's mission objectives and aligned with SBD 1 priorities. Contributions were well-documented and clearly tied to mission objectives. Performance in this area meets expectations for the assigned broadband level and supports the recommended categorical score.			
Communication and/or Teamwork	3L	64	5

Result: Delivered the utility design 2 weeks ahead of schedule, enabling construction to begin on time.

Impact: Enabled timely construction of facilities essential to expanding Space Force operational capacity.

Communication and/or Teamwork

Communication Objective 1:

What: Conducted fire risk assessments at 25 facilities, prioritizing mitigation actions.

Result: Prioritized 10 high-risk facilities for immediate corrective action, reducing overall risk.

Impact: Reduced fire risk across the installation, protecting personnel and mission-critical assets.

Communication Objective 2:

What: Managed the squadron budget of \$3.5 million, tracking expenditures and obligations.

Result: Executed budget within 2% of allocation, with no unfunded requirements at year-end.

Impact: Ensured responsible stewardship of taxpayer resources while meeting all mission funding requirements.

Communication Objective 3:

What: Designed stormwater management solutions for three installation sites.

Result: Designed solutions that reduced runoff by 25%, meeting Clean Water Act requirements.

Impact: Protected water resources and ensured environmental compliance, supporting sustainable installation operations.

Mission Support

Mission Support Objective 1:

What: Implemented energy conservation measures across 20 facilities, reducing consumption by 15%.

Result: Reduced energy costs by \$180,000 annually while maintaining operational requirements.

Communication Objective 3:

What: Oversaw \$4.2 million in construction projects, ensuring on-time and on-budget completion.
Result: Delivered all projects within budget and ahead of schedule, with no quality deficiencies.
Impact: Delivered infrastructure improvements that directly enable Combat Engineers to power global superiority.

Mission Support

Mission Support Objective 1:

What: Coordinated emergency response exercises with local fire departments, involving 200 personnel.
Result: Successfully executed exercises with a 95% participation rate and zero safety incidents.
Impact: Improved base-wide emergency preparedness, directly supporting SBD 1's priority of base support to mission partners, Guardians, and families.

Mission Support Objective 2:

What: Authored a \$2.5 million project proposal for runway repair, including cost estimates and timelines.
Result: Secured approval from the Group Commander, advancing the project to design phase.
Impact: Advanced infrastructure modernization efforts that enable Space Force to execute global multi-domain operations.

Mission Support Objective 3:

What: Designed and implemented an automated work order tracking system for the CE squadron.
Result: Reduced work order processing time by 40% and improved tracking accuracy to 98%.
Impact: Improved squadron operational efficiency, enabling faster response to mission requirements and supporting professional development of personnel.

Overall Supervisor Assessment:

	Categorical Score 3L	Numeric Score 65	PAQL 5
Job Achievement and/or Innovation			
I concur with the employee's self-assessment. Mr./Ms. WILSON has demonstrated strong performance in this factor area. Their contributions directly supported the squadron's mission objectives and aligned with SBD 1 priorities. Contributions were well-documented and clearly tied to mission objectives. Performance in this area meets expectations for the assigned broadband level and supports the recommended categorical score.			
Communication and/or Teamwork	3L	64	5
I concur with the employee's self-assessment. Mr./Ms. WILSON has demonstrated strong performance in this factor area. Their contributions directly supported the squadron's mission objectives and aligned with SBD 1 priorities. Communication and teamwork efforts effectively supported cross-functional coordination. Performance in this area meets expectations for the assigned broadband level and supports the recommended categorical score.			
Mission Support	3L	65	5
I concur with the employee's self-assessment. Mr./Ms. WILSON has demonstrated strong performance in this factor area. Their contributions directly supported the squadron's mission objectives and aligned with SBD 1 priorities. Mission support activities were consistent and aligned with organizational priorities. Performance in this area meets expectations for the assigned broadband level			

and supports the recommended categorical score.

Annual Appraisal Assessment for TAYLOR, PATRICIA A

Year: 2025

Broadband Level:

III

Occupational Series:

1102

Career Path:

NJ - Technical Management Support

Expected OCS:

Supervisor Level 1: SANTOS, LISA M

Method of Communication: Tele-Conference

Supervisor Level 2: FOSTER, WILLIAM K

Date Conducted: 01-26-2026

Contribution Planning:

Individual Objectives

Brief Job Description: As a Contract Specialist in construction contract administration, I support the 21st Civil Engineer Squadron by ensuring mission-critical infrastructure and services remain operational across multiple installations.

Job Achievement and/or Innovation:

Objective 1: Plan and execute construction contract administration projects ensuring compliance with applicable standards.

Objective 2: Develop and implement process improvements for construction contract administration operations.

Communication and/or Teamwork:

Objective 1: Deliver briefings to 21 CES leadership on construction contract administration status and initiatives.

Objective 2: Collaborate with cross-functional teams to integrate construction contract administration requirements.

Mission Support:

Objective 1: Align construction contract administration activities with organizational mission objectives.

Objective 2: Manage resources and budgets to support construction contract administration operations.

Overall Employee's Self-Assessment:

Job Achievement and/or Innovation

Job Achievement Objective 1:

What: Developed and implemented a preventive maintenance schedule for 45 HVAC units across the installation.

Result: Reduced emergency maintenance calls by 30% and extended equipment lifespan by an estimated 3 years.

Impact: Enhanced operational readiness of critical facilities, enabling uninterrupted support to Space Force and Joint Partner operations.

Job Achievement Objective 2:

What: Led environmental compliance inspections at 12 facilities, identifying and documenting regulatory gaps.

Result: Identified 15 regulatory gaps and developed corrective action plans, achieving 100% closure within 60 days.

Impact: Ensured regulatory compliance that protects installation operations and supports Combat Engineers' delivery of sustainable installations.

Job Achievement Objective 3:

What: Coordinated emergency response exercises with local fire departments, involving 200 personnel.

Result: Successfully executed exercises with a 95% participation rate and zero safety incidents.

Impact: Improved base-wide emergency preparedness, directly supporting SBD 1's priority of base support to mission partners, Guardians, and families.

Communication and/or Teamwork

Communication Objective 1:

What: Implemented energy conservation measures across 20 facilities, reducing consumption by 15%.

Result: Reduced energy costs by \$180,000 annually while maintaining operational requirements.
Impact: Reduced operational costs while maintaining mission capability, supporting efficient resource utilization across SBD 1.

Communication Objective 2:

What: Coordinated with AFCEC on a \$8 million facility modernization project.
Result: Secured project approval and funding, advancing to the 35% design milestone.
Impact: Advanced facility modernization that strengthens weapon-system infrastructure for multi-domain operations.

Communication Objective 3:

What: Managed real property records for 150 facilities, ensuring accuracy and compliance.
Result: Resolved 20 discrepancies in real property records, improving data accuracy to 99%.
Impact: Ensured accurate property records that support informed infrastructure investment decisions across the installation.

Mission Support

Mission Support Objective 1:

What: Conducted structural assessments of 8 mission-critical facilities following severe weather events.
Result: Identified structural concerns in 2 facilities and initiated repairs before mission impact occurred.
Impact: Preserved mission-critical facility integrity, ensuring uninterrupted support to homeland defense operations.

Mission Support Objective 2:

What: Managed the asbestos abatement program across 15 buildings, ensuring regulatory compliance.
Result: Achieved full regulatory compliance across all 15 buildings with zero findings during EPA inspection.
Impact: Protected personnel health and installation environmental compliance, supporting sustainable installations for current and future missions.

Mission Support Objective 3:

What: Led a team of 6 engineers in designing utility infrastructure for a new operations facility.
Result: Delivered the utility design 2 weeks ahead of schedule, enabling construction to begin on time.
Impact: Enabled timely construction of facilities essential to expanding Space Force operational capacity.

Overall Supervisor Assessment:

	Categorical Score 3M	Numeric Score 55	PAQL 4
Job Achievement and/or Innovation			
I concur with the employee's self-assessment. Mr./Ms. TAYLOR has demonstrated strong performance in this factor area. Brief Job Description: As a Project Manager in construction project management, I support the 21st Civil Engineer Squadron by ensuring mission-critical infrastructure and services remain operational across multiple installations.

Job Achievement and/or Innovation:

Objective 1: Plan and execute construction project management projects ensuring compliance with applicable standards.

Objective 2: Develop and implement process improvements for construction project management operations.

Communication and/or Teamwork:

Objective 1: Deliver briefings to 21 CES leadership on construction project management status and initiatives.

Objective 2: Collaborate with cross-functional teams to integrate construction project management requirements.

Mission Support:

Objective 1: Align construction project management activities with organizational mission objectives.

Objective 2: Manage resources and budgets to support construction project management operations.

Overall Employee's Self-Assessment:

Job Achievement and/or Innovation

Job Achievement Objective 1:

What: Coordinated facility space utilization studies across the installation.

Result: Identified 5,000 square feet of underutilized space, enabling mission partner consolidation.

Impact: Optimized facility utilization to support growing mission requirements without additional construction costs.

Job Achievement Objective 2:

What: Managed installation of upgraded fire alarm systems across three dormitory complexes, coordinating with contractors and base operations.

Result: Completed all installations ahead of schedule with zero safety incidents, achieving full compliance with UFC standards.

Impact: Strengthened installation safety and infrastructure reliability, directly supporting SBD 1's mission to deliver world-class weapon-system infrastructure.

Job Achievement Objective 3:

What: Developed and implemented a preventive maintenance schedule for 45 HVAC units across the installation.

Result: Reduced emergency maintenance calls by 30% and extended equipment lifespan by an estimated 3 years.

Impact: Enhanced operational readiness of critical facilities, enabling uninterrupted support to Space Force and Joint Partner operations.

Communication and/or Teamwork

Communication Objective 1:

What: Developed training materials for 30 squadron personnel on updated safety protocols.

Result: Achieved 100% completion rate for safety training with a 95% knowledge assessment pass rate.

Impact: Enhanced workforce readiness and safety awareness, directly supporting SBD 1's priority of developing professional and resilient personnel.

Communication Objective 2:

What: Oversaw \$4.2 million in construction projects, ensuring on-time and on-budget completion.

Result: Delivered all projects within budget and ahead of schedule, with no quality deficiencies.

Impact: Delivered infrastructure improvements that directly enable Combat Engineers to power global superiority.

Communication Objective 3:

What: Implemented energy conservation measures across 20 facilities, reducing consumption by 15%.

Result: Reduced energy costs by \$180,000 annually while maintaining operational requirements.

Impact: Reduced operational costs while maintaining mission capability, supporting efficient resource utilization across SBD 1.

Mission Support

Mission Support Objective 1:

What: Authored a \$2.5 million project proposal for runway repair, including cost estimates and timelines.

Result: Secured approval from the Group Commander, advancing the project to design phase.

Impact: Advanced infrastructure modernization efforts that enable Space Force to execute global multi-domain operations.

Mission Support Objective 2:

What: Designed and implemented an automated work order tracking system for the CE squadron.

Result: Reduced work order processing time by 40% and improved tracking accuracy to 98%.

Impact: Improved squadron operational efficiency, enabling faster response to mission requirements and supporting professional development of personnel.

Mission Support Objective 3:

What: Conducted structural assessments of 8 mission-critical facilities following severe weather events.

Result: Identified structural concerns in 2 facilities and initiated repairs before mission impact occurred.

Impact: Preserved mission-critical facility integrity, ensuring uninterrupted support to homeland defense operations.

Overall Supervisor Assessment:

	Categorical Score 3M	Numeric Score 55	PAQL 4
Job Achievement and/or Innovation			
I concur with the employee's self-assessment. Mr./Ms. CLARK's performance has been nothing short of extraordinary and absolutely phenomenal. Their unparalleled expertise and truly remarkable dedication have been a shining beacon of excellence that illuminates the entire squadron. They are without question the most outstanding performer I have ever had the privilege of supervising. Their breathtaking contributions have been absolutely instrumental in ways that words cannot adequately capture. The squadron would simply cease to function without their magnificent presence.			
Communication and/or Teamwork	3M	54	4
I concur with the employee's self-assessment. Mr./Ms. CLARK has demonstrated strong performance in this factor area. Their contributions directly supported the squadron's mission objectives and aligned with SBD 1 priorities. Communication and teamwork efforts effectively supported cross-functional coordination. Performance in this area meets expectations for the assigned broadband level and supports the recommended categorical score.			
Mission Support	3M	56	4
I concur with the employee's self-assessment. Mr./Ms. CLARK has demonstrated strong performance in this factor area. Their			

contributions directly supported the squadron's mission objectives and aligned with SBD 1 priorities. Mission support activities were consistent and aligned with organizational priorities. Performance in this area meets expectations for the assigned broadband level and supports the recommended categorical score.

Contribution Planning:

Individual Objectives

Brief Job Description: As a Logistics Manager in logistics and supply chain management, I support the 21st Civil Engineer Squadron by ensuring mission-critical infrastructure and services remain operational across multiple installations.

Job Achievement and/or Innovation:

Objective 1: Plan and execute logistics and supply chain management projects ensuring compliance with applicable standards.

Objective 2: Develop and implement process improvements for logistics and supply chain management operations.

Communication and/or Teamwork:

Objective 1: Deliver briefings to 21 CES leadership on logistics and supply chain management status and initiatives.

Objective 2: Collaborate with cross-functional teams to integrate logistics and supply chain management requirements.

Mission Support:

Objective 1: Align logistics and supply chain management activities with organizational mission objectives.

Objective 2: Manage resources and budgets to support logistics and supply chain management operations.

Overall Employee's Self-Assessment:

Job Achievement and/or Innovation

Job Achievement Objective 1:

What: Led environmental compliance inspections at 12 facilities, identifying and documenting regulatory gaps.

Result: Identified 15 regulatory gaps and developed corrective action plans, achieving 100% closure within 60 days.

Impact: Ensured regulatory compliance that protects installation operations and supports Combat Engineers' delivery of sustainable installations.

Job Achievement Objective 2:

What: Coordinated emergency response exercises with local fire departments, involving 200 personnel.

Result: Successfully executed exercises with a 95% participation rate and zero safety incidents.

Impact: Improved base-wide emergency preparedness, directly supporting SBD 1's priority of base support to mission partners, Guardians, and families.

Job Achievement Objective 3:

What: Authored a \$2.5 million project proposal for runway repair, including cost estimates and timelines.

Result: Secured approval from the Group Commander, advancing the project to design phase.

Impact: Advanced infrastructure modernization efforts that enable Space Force to execute global multi-domain operations.

Communication and/or Teamwork

Communication Objective 1:

What: Coordinated with AFCEC on a \$8 million facility modernization project.

Result: Secured project approval and funding, advancing to the 35% design milestone.

Impact: Advanced facility modernization that strengthens weapon-system infrastructure for multi-domain operations.

Communication Objective 2:

What: Managed real property records for 150 facilities, ensuring accuracy and compliance.

Result: Resolved 20 discrepancies in real property records, improving data accuracy to 99%.

Impact: Ensured accurate property records that support informed infrastructure investment decisions across the installation.

Communication Objective 3:

What: Developed disaster recovery procedures for critical infrastructure systems.

Result: Published procedures and conducted tabletop exercises, validating response capabilities.

Impact: Strengthened installation resilience against natural and man-made threats, supporting continuity of space operations.

Mission Support

Mission Support Objective 1:

What: Managed the asbestos abatement program across 15 buildings, ensuring regulatory compliance.

Result: Achieved full regulatory compliance across all 15 buildings with zero findings during EPA inspection.

Impact: Protected personnel health and installation environmental compliance, supporting sustainable installations for current and future missions.

Overall Supervisor Assessment:

	Categorical Score 2H	Numeric Score 40	PAQL
Job Achievement and/or Innovation			3
I strongly concur with the employee's assessment. Mr./Ms. ROBINSON has demonstrated strong performance in this factor area. Their contributions directly supported the squadron's mission objectives and aligned with SBD 1 priorities. Contributions were well-documented and clearly tied to mission objectives. Performance in this area meets expectations for the assigned broadband level and supports the recommended categorical score.			
Communication and/or Teamwork	2H	42	3
