CCAS ANNUAL ASSESSMENT EXPORT - FY2025 (SYNTHETIC TEST DATA)

All employee names, supervisors, projects, and narratives in this file are fictitious and generated for software testing. No CUI is present.

Annual Appraisal Assessment for Snuffy, Joe M Year: 2025

Broadband Level:	Occupational Series:	Career Path:	Expected OCS:
III	1170 - REALTY	NH - Business Management and Technical Management	Professional

Supervisor Level 1: SMITH, JOE D Supervisor Level 2: ANDERSON, SMITH A

Method of Communication: In person Date Conducted: 12 September 2025

Contribution Planning: Individual Objectives

Brief Job Description: I manage Real Property Accountability, Physical Inventory, and In-grant/Out-grant Management, ensuring compliance with regulations, accurate records, and enhanced mission support.

Job Achievement and/or Innovation:

Objective 1: Coordinate, plan, manage, and execute all aspects of Real Property Accountability based on Federal Laws/Regulations and DoD/DAF policy, safeguarding real property records and ensuring records meet all FIAR requirements within 90% accuracy.

Objective 2: Coordinate, plan, manage, and execute all aspects of Physical Inventory of all real property, inspecting all necessary components and completing inventory sheets for inspected facilities with a 95% accuracy rate.

Communication and/or Teamwork:

Objective 1: Provide oversight of the DD Form 1354 program by reviewing, validating, transferring, and accepting real property records at cost and/or capitalization for all performed projects.

Objective 2: Coordinate, plan, manage, and execute all aspects of In-Grant/Out-Grant Management, reviewing requests and coordinating each action with appropriate offices within DAF.

Mission Support:

Objective 1: Participate in facility final inspections to validate DD Form 1354 data and capitalize new or improved assets, updating the appropriate sections of the Accountable Property System of Record.

Objective 2: Update records for all changes and obtain necessary approvals, negotiating cost-effective terms and executing instruments and boundary surveys 90% on time.

Overall Employee's Self-Assessment:**Job Achievement and/or Innovation****Accomplishment: Hangar 3 apron - Records Reconciliation**

(W) What I did: I planned and executed the records reconciliation for the Hangar 3 apron (record PR-7771), coordinating with the security forces plans office (tracking line 725) and logging results in NexGen IT.

-

(R) Result: As a result, closing 16 of 16 assigned items, all supporting documents were filed and indexed (case 941) against AFCEC reporting requirements.

-

(I) Impact: This supported base support operations by eliminating a recurring audit finding.

-

Accomplishment: Dormitory 1245 - Boundary Survey Coordination

(W) What I did: I planned and executed the boundary survey coordination for the Dormitory 1245 (record PR-7808), coordinating with the civil engineer operations flight (tracking line 738) and logging results in the project tracking spreadsheet.

-

(R) Result: As a result, closing 21 of 21 assigned items, the backlog was reduced from 31 items to 4 (case 209) against DoD real property accountability requirements.

-

(I) Impact: This supported the launch support mission by reducing sustainment costs on unneeded infrastructure.

-

Accomplishment: Munitions storage area - Capitalization Review

(W) What I did: I planned and executed the capitalization review for the Munitions storage area (record PR-7845), coordinating with the environmental element (tracking line 751) and logging results in the Accountable Property System of Record.

-

(R) Result: As a result, closing 26 of 26 assigned items, 23 of 23 records were validated (case 238) against FIAR requirements.

-

(I) Impact: This supported the installation space control mission by shortening the project acceptance timeline.

Communication and/or Teamwork

Accomplishment: Ridgeline communications pad - Encroachment Resolution

(W) What I did: I planned and executed the encroachment resolution for the Ridgeline communications pad (record PR-7882), coordinating with the design branch (tracking line 764) and logging results in the real property database.

(R) Result: As a result, closing 31 of 31 assigned items, the package was approved without rework (case 267) against DAF records management requirements.

(I) Impact: This supported homeland defense operations by improving the accuracy of the funding request.

Accomplishment: Legacy antenna field - Easement Renewal Package

(W) What I did: I planned and executed the easement renewal package for the Legacy antenna field (record PR-7919), coordinating with the GIS section (tracking line 777) and logging results in the installation GIS layer.

(R) Result: As a result, closing 36 of 36 assigned items, record accuracy reached 96 percent (case 296) against installation audit requirements.

(I) Impact: This supported the missile warning mission by closing a long-standing compliance gap.

Accomplishment: Utilities corridor 7 - Inventory Validation

(W) What I did: I planned and executed the inventory validation for the Utilities corridor 7 (record PR-7956), coordinating with the resource advisor (tracking line 790) and logging results in NexGen IT.

(R) Result: As a result, closing 41 of 41 assigned items, the submittal was accepted on the first review (case 325) against AFCEC reporting requirements.

(I) Impact: This supported base support operations by freeing manpower for higher-priority actions.

Mission Support

Accomplishment: North Gate access road - Acceptance Inspection Cycle

(W) What I did: I planned and executed the acceptance inspection cycle for the North Gate access road (record PR-7993), coordinating with the programming section (tracking line 803) and logging results in the project tracking spreadsheet.

(R) Result: As a result, closing 5 of 5 assigned items, no discrepancies were identified in follow-up review (case 354) against DoD real property accountability requirements.

(I) Impact: This supported the launch support mission by removing a documented funding shortfall.

Accomplishment: Perimeter fence segment C - Data Migration Effort

(W) What I did: I planned and executed the data migration effort for the Perimeter fence segment C (record PR-8030), coordinating with the installation JAG office (tracking line 816) and logging results in the Accountable Property System of Record.

(R) Result: As a result, closing 10 of 10 assigned items, all 14 assigned actions closed on schedule (case 383) against FIAR requirements.

(I) Impact: This supported the installation space control mission by eliminating a recurring audit finding.

Accomplishment: Airfield lighting vault - Audit Sampling Review

(W) What I did: I planned and executed the audit sampling review for the Airfield lighting vault (record PR-8067), coordinating with the contracting squadron (tracking line 829) and logging results in the real property database.

-

(R) Result: As a result, closing 15 of 15 assigned items, all findings were cleared before the deadline (case 412) against DAF records management requirements.

-

(I) Impact: This supported homeland defense operations by reducing sustainment costs on unneeded infrastructure.

-

Overall Supervisor Assessment:

Factor	Categorical Score	Numeric Score	PAQL
Job Achievement and/or Innovation	Meets	68	3
Communication and/or Teamwork	Meets	68	3
Mission Support	Meets	68	3

Job Achievement and/or Innovation

Met expectations. The employee delivered the Security forces annex requirements validation on schedule alongside the GIS section. DAF guidance supports a recommended PAQL of 3; coordination gaps were resolved before escalation.

Communication and/or Teamwork

Meeting expected contributions. The employee carried the Vehicle maintenance shop 848 cost estimate reconciliation through review with the resource advisor. Under DAF scoring guidelines a PAQL of 3 applies; the reviewing office accepted every submittal.

Mission Support

Meeting expected contributions. The employee ran the Fire station 2 sustainment forecast build from intake to closeout with the programming section. Against the DAF criteria the PAQL is 3; quality checks found no repeat discrepancies.

Annual Appraisal Assessment for Charlie, Robert T Year: 2025

Broadband Level:	Occupational Series:	Career Path:	Expected OCS:
III	1170 - REALTY	NH - Business Management and Technical Management	Professional

Supervisor Level 1: SMITH, JOE D Supervisor Level 2: ANDERSON, SMITH A

Method of Communication: In person Date Conducted: 12 September 2025

Contribution Planning: Individual Objectives

Brief Job Description: I manage Real Property Accountability, Physical Inventory, and In-grant/Out-grant Management, ensuring compliance with regulations, accurate records, and enhanced mission support.

Job Achievement and/or Innovation:

Objective 1: Coordinate, plan, manage, and execute all aspects of Real Property Accountability based on Federal Laws/Regulations and DoD/DAF policy, safeguarding real property records and ensuring records meet all FIAR requirements within 90% accuracy.

Objective 2: Coordinate, plan, manage, and execute all aspects of Physical Inventory of all real property, inspecting all necessary components and completing inventory sheets for inspected facilities with a 95% accuracy rate.

Communication and/or Teamwork:

Objective 1: Provide oversight of the DD Form 1354 program by reviewing, validating, transferring, and accepting real property records at cost and/or capitalization for all performed projects.

Objective 2: Coordinate, plan, manage, and execute all aspects of In-Grant/Out-Grant Management, reviewing requests and coordinating each action with appropriate offices within DAF.

Mission Support:

Objective 1: Participate in facility final inspections to validate DD Form 1354 data and capitalize new or improved assets, updating the appropriate sections of the Accountable Property System of Record.

Objective 2: Update records for all changes and obtain necessary approvals, negotiating cost-effective terms and executing instruments and boundary surveys 90% on time.

Overall Employee's Self-Assessment:**Job Achievement and/or Innovation**

(W): I planned and executed the lease administration action for the Consolidated storage complex (record PR-8104), coordinating with the facility manager (tracking line 842) and logging results in the installation GIS layer.

-

(R): As a result, closing 20 of 20 assigned items, the action closed 11 days ahead of suspense (case 441) against installation audit requirements.

-

(I): This supported the missile warning mission by shortening the project acceptance timeline.

-

(W): I planned and executed the utility privatization review for the Emergency generator vault (record PR-8141), coordinating with the security forces plans office (tracking line 855) and logging results in NexGen IT.

-

(R): As a result, closing 25 of 25 assigned items, all supporting documents were filed and indexed (case 470) against AFCEC reporting requirements.

-

(I): This supported base support operations by improving the accuracy of the funding request.

-

Communication and/or Teamwork

(W): I planned and executed the site activation package for the Fuels facility 2210 (record PR-8215), coordinating with the environmental element (tracking line 881) and logging results in the Accountable Property System of Record.

-

(R): As a result, closing 35 of 35 assigned items, 23 of 23 records were validated (case 528) against FIAR requirements.

-

(I): This supported the installation space control mission by freeing manpower for higher-priority actions.

-

(W): I planned and executed the quality assurance surveillance review for the Child development center (record PR-8252), coordinating with the design branch (tracking line 894) and logging results in the real property database.

-

(R): As a result, closing 40 of 40 assigned items, the package was approved without rework (case 557) against DAF records management requirements.

-

(I): This supported homeland defense operations by removing a documented funding shortfall.

-

Mission Support

(W): I planned and executed the cost estimate reconciliation for the Vehicle maintenance shop 848 (record PR-8326), coordinating with the resource advisor (tracking line 920) and logging results in NexGen IT.

-

(R): As a result, closing 9 of 9 assigned items, the submittal was accepted on the first review (case 615) against AFCEC reporting requirements.

-

(I): This supported base support operations by reducing sustainment costs on unneeded infrastructure.

-

(W): I planned and executed the sustainment forecast build for the Fire station 2 (record PR-8363), coordinating with the programming section (tracking line 933) and logging results in the project tracking spreadsheet.

-

(R): As a result, closing 14 of 14 assigned items, no discrepancies were identified in follow-up review (case 644) against DoD real property accountability requirements.

-

(I): This supported the launch support mission by shortening the project acceptance timeline.

-

Overall Supervisor Assessment:

Factor	Categorical Score	Numeric Score	PAQL
Job Achievement and/or Innovation	Meets	68	3
Communication and/or Teamwork	Meets	68	3
Mission Support	Meets	68	3

Job Achievement and/or Innovation

The employee finished the Building 1470 annex end-to-end disposal action after reconciling records with the installation JAG office. Applying DAF scoring guidance yields a PAQL of 3; deliverables arrived ahead of the stated deadline.

Communication and/or Teamwork

The employee executed the Water treatment plant 1102 condition assessment and briefed results to the contracting squadron. The DAF guidelines place this at PAQL 3; audit sampling returned no adverse findings.

Mission Support

The employee closed the Base supply warehouse space utilization survey while supporting the facility manager. Referencing DAF scoring criteria, PAQL 3 is recommended; assigned actions closed without supervisor intervention.

Annual Appraisal Assessment for Delta, Maria L Year: 2025

Broadband Level:	Occupational Series:	Career Path:	Expected OCS:
III	1170 - REALTY	NH - Business Management and Technical Management	Professional

Supervisor Level 1: JONES, KAREN P Supervisor Level 2: ANDERSON, SMITH A

Method of Communication: In person Date Conducted: 12 September 2025

Contribution Planning: Individual Objectives

Brief Job Description: I manage Real Property Accountability, Physical Inventory, and In-grant/Out-grant Management, ensuring compliance with regulations, accurate records, and enhanced mission support.

Job Achievement and/or Innovation:

Objective 1: Coordinate, plan, manage, and execute all aspects of Real Property Accountability based on Federal Laws/Regulations and DoD/DAF policy, safeguarding real property records and ensuring records meet all FIAR requirements within 90% accuracy.

Objective 2: Coordinate, plan, manage, and execute all aspects of Physical Inventory of all real property, inspecting all necessary components and completing inventory sheets for inspected facilities with a 95% accuracy rate.

Communication and/or Teamwork:

Objective 1: Provide oversight of the DD Form 1354 program by reviewing, validating, transferring, and accepting real property records at cost and/or capitalization for all performed projects.

Objective 2: Coordinate, plan, manage, and execute all aspects of In-Grant/Out-Grant Management, reviewing requests and coordinating each action with appropriate offices within DAF.

Mission Support:

Objective 1: Participate in facility final inspections to validate DD Form 1354 data and capitalize new or improved assets, updating the appropriate sections of the Accountable Property System of Record.

Objective 2: Update records for all changes and obtain necessary approvals, negotiating cost-effective terms and executing instruments and boundary surveys 90% on time.

Overall Employee's Self-Assessment:**Job Achievement and/or Innovation**

(W): I planned and executed the condition assessment for the Water treatment plant 1102 (record PR-8437), coordinating with the contracting squadron (tracking line 959) and logging results in the real property database.

-

(R): As a result, closing 24 of 24 assigned items, all findings were cleared before the deadline (case 702) against DAF records management requirements.

-

(I): This supported homeland defense operations by closing a long-standing compliance gap.

-

(W): I planned and executed the space utilization survey for the Base supply warehouse (record PR-8474), coordinating with the facility manager (tracking line 972) and logging results in the installation GIS layer.

-

(R): As a result, closing 29 of 29 assigned items, the action closed 11 days ahead of suspense (case 731) against installation audit requirements.

-

(I): This supported the missile warning mission by freeing manpower for higher-priority actions.

-

(W): I planned and executed the records reconciliation for the Hangar 3 apron (record PR-8511), coordinating with the security forces plans office (tracking line 108) and logging results in NexGen IT.

-

(R): As a result, closing 34 of 34 assigned items, all supporting documents were filed and indexed (case 760) against AFCEC reporting requirements.

-

(I): This supported base support operations by removing a documented funding shortfall.

-

Communication and/or Teamwork

(W): I planned and executed the boundary survey coordination for the Dormitory 1245 (record PR-8548), coordinating with the civil engineer operations flight (tracking line 121) and logging results in the project tracking spreadsheet.

-

(R): As a result, closing 39 of 39 assigned items, the backlog was reduced from 31 items to 4 (case 789) against DoD real property accountability requirements.

-

(I): This supported the launch support mission by eliminating a recurring audit finding.

-

(W): I planned and executed the capitalization review for the Munitions storage area (record PR-8585), coordinating with the environmental element (tracking line 134) and logging results in the Accountable Property System of Record.

-

(R): As a result, closing 3 of 3 assigned items, 23 of 23 records were validated (case 818) against FIAR requirements.

-

(I): This supported the installation space control mission by reducing sustainment costs on unneeded infrastructure.

-

(W): I planned and executed the encroachment resolution for the Ridgeline communications pad (record PR-8622), coordinating with the design branch (tracking line 147) and logging results in the real property database.

-

(R): As a result, closing 8 of 8 assigned items, the package was approved without rework (case 847) against DAF records management requirements.

-

(I): This supported homeland defense operations by shortening the project acceptance timeline.

-

Mission Support

(W): I planned and executed the easement renewal package for the Legacy antenna field (record PR-8659), coordinating with the GIS section (tracking line 160) and logging results in the installation GIS layer.

-

(R): As a result, closing 13 of 13 assigned items, record accuracy reached 96 percent (case 876) against installation audit requirements.

-

(I): This supported the missile warning mission by improving the accuracy of the funding request.

-

(W): I planned and executed the inventory validation for the Utilities corridor 7 (record PR-8696), coordinating with the resource advisor (tracking line 173) and logging results in NexGen IT.

-

(R): As a result, closing 18 of 18 assigned items, the submittal was accepted on the first review (case 905) against AFCEC reporting requirements.

-

(I): This supported base support operations by closing a long-standing compliance gap.

-

(W): I planned and executed the acceptance inspection cycle for the North Gate access road (record PR-8733), coordinating with the programming section (tracking line 186) and logging results in the project tracking spreadsheet.

-

(R): As a result, closing 23 of 23 assigned items, no discrepancies were identified in follow-up review (case 934) against DoD real property accountability requirements.

-

(I): This supported the launch support mission by freeing manpower for higher-priority actions.

-

Overall Supervisor Assessment:

Factor	Categorical Score	Numeric Score	PAQL
Job Achievement and/or Innovation	Meets	68	3

Communication and/or Teamwork	Meets	68	3
Mission Support	Meets	68	3

Job Achievement and/or Innovation

Meeting expected contributions. The employee completed the Hangar 3 apron records reconciliation and closed each record with the security forces plans office. This tracks to a PAQL of 3 under DAF guidance; the section met its stated accuracy goal.

Communication and/or Teamwork

Meeting expected contributions. The employee delivered the Dormitory 1245 boundary survey coordination on schedule alongside the civil engineer operations flight. By DAF scoring standards the recommended PAQL is 3; revisions were limited to administrative corrections.

Mission Support

Meeting expected contributions. The employee carried the Munitions storage area capitalization review through review with the environmental element. DAF criteria place this contribution at PAQL 3; peer review identified no substantive errors.

Annual Appraisal Assessment for Echo, David P Year: 2025

Objective 2: Update records for all changes and obtain necessary approvals, negotiating cost-effective terms and executing instruments and boundary surveys 90% on time.

Overall Employee's Self-Assessment:**Job Achievement and/or Innovation**

(W): I planned and executed the condition assessment for the Water treatment plant 1102 (record PR-6838), coordinating with the contracting squadron (tracking line 928) and logging results in the real property database.

-

(R): As a result, closing 40 of 40 assigned items, all findings were cleared before the deadline (case 414) against DAF records management requirements.

-

(I): This supported homeland defense operations by reducing sustainment costs on unneeded infrastructure.

-

(W): I planned and executed the data migration effort for the Perimeter fence segment C (record PR-8770), coordinating with the installation JAG office (tracking line 199) and logging results in the Accountable Property System of Record.

-

(R): As a result, closing 28 of 28 assigned items, all 14 assigned actions closed on schedule (case 202) against FIAR requirements.

-

(I): This supported the installation space control mission by removing a documented funding shortfall.

-

(W): I planned and executed the audit sampling review for the Airfield lighting vault (record PR-8807), coordinating with the contracting squadron (tracking line 212) and logging results in the real property database.

-

(R): As a result, closing 33 of 33 assigned items, all findings were cleared before the deadline (case 231) against DAF records management requirements.

-

(I): This supported homeland defense operations by eliminating a recurring audit finding.

-

Communication and/or Teamwork

(W): I planned and executed the utility privatization review for the Emergency generator vault (record PR-8881), coordinating with the security forces plans office (tracking line 238) and logging results in NexGen IT.

-

(R): As a result, closing 43 of 43 assigned items, all supporting documents were filed and indexed (case 289) against AFCEC reporting requirements.

-

(I): This supported base support operations by shortening the project acceptance timeline.

-

(W): I planned and executed the space utilization survey for the Base supply warehouse (record PR-6875), coordinating with the facility manager (tracking line 941) and logging results in the installation GIS layer.

-

(R): As a result, closing 4 of 4 assigned items, the action closed 11 days ahead of suspense (case 443) against installation audit requirements.

-

(I): This supported the missile warning mission by shortening the project acceptance timeline.

-

(W): I planned and executed the quality assurance surveillance review for the Child development center (record PR-8992), coordinating with the design branch (tracking line 277) and logging results in the real property database.

-

(R): As a result, closing 17 of 17 assigned items, the package was approved without rework (case 376) against DAF records management requirements.

-

(I): This supported homeland defense operations by freeing manpower for higher-priority actions.

-

Mission Support

(W): I planned and executed the sustainment forecast build for the Fire station 2 (record PR-9103), coordinating with the programming section (tracking line 316) and logging results in the project tracking spreadsheet.

-

(R): As a result, closing 32 of 32 assigned items, no discrepancies were identified in follow-up review (case 463) against DoD real property accountability requirements.

-

(I): This supported the launch support mission by reducing sustainment costs on unneeded infrastructure.

-

(W): I planned and executed the end-to-end disposal action for the Building 1470 annex (record PR-9140), coordinating with the installation JAG office (tracking line 329) and logging results in the Accountable Property System of Record.

-

(R): As a result, closing 37 of 37 assigned items, all 14 assigned actions closed on schedule (case 492) against FIAR requirements.

-

(I): This supported the installation space control mission by shortening the project acceptance timeline.

-

(W): I planned and executed the condition assessment for the Water treatment plant 1102 (record PR-9177), coordinating with the contracting squadron (tracking line 342) and logging results in the real property database.

-

(R): As a result, closing 42 of 42 assigned items, all findings were cleared before the deadline (case 521) against DAF records management requirements.

-

(I): This supported homeland defense operations by improving the accuracy of the funding request.

-

Overall Supervisor Assessment:

Factor	Categorical Score	Numeric Score	PAQL
--------	-------------------	---------------	------

Job Achievement and/or Innovation	Meets	68	3
Communication and/or Teamwork	Meets	68	3
Mission Support	Meets	68	3

Job Achievement and/or Innovation

Meeting expected contributions. The employee ran the Ridgeline communications pad encroachment resolution from intake to closeout with the design branch. Per DAF scoring guidelines this supports a PAQL of 3; outputs were reused as the section standard.

Communication and/or Teamwork

Meeting expected contributions. The employee finished the Legacy antenna field easement renewal package after reconciling records with the GIS section. Measured against DAF PAQL guidance the level is 3; no missed suspenses occurred during the cycle.

Mission Support

Meeting expected contributions. The employee executed the Utilities corridor 7 inventory validation and briefed results to the resource advisor. DAF guidance supports a recommended PAQL of 3; work products required minimal revision.

Annual Appraisal Assessment for Foxtrot, Susan R Year: 2025

Broadband Level:	Occupational Series:	Career Path:	Expected OCS:
III	1170 - REALTY	NH - Business Management and Technical Management	Professional

Supervisor Level 1: JONES, KAREN P Supervisor Level 2: ANDERSON, SMITH A

Method of Communication: In person Date Conducted: 12 September 2025

Contribution Planning: Individual Objectives

Brief Job Description: I manage Real Property Accountability, Physical Inventory, and In-grant/Out-grant Management, ensuring compliance with regulations, accurate records, and enhanced mission support.

Job Achievement and/or Innovation:

Objective 1: Coordinate, plan, manage, and execute all aspects of Real Property Accountability based on Federal Laws/Regulations and DoD/DAF policy, safeguarding real property records and ensuring records meet all FIAR requirements within 90% accuracy.

Objective 2: Coordinate, plan, manage, and execute all aspects of Physical Inventory of all real property, inspecting all necessary components and completing inventory sheets for inspected facilities with a 95% accuracy rate.

Communication and/or Teamwork:

Objective 1: Provide oversight of the DD Form 1354 program by reviewing, validating, transferring, and accepting real property records at cost and/or capitalization for all performed projects.

Objective 2: Coordinate, plan, manage, and execute all aspects of In-Grant/Out-Grant Management, reviewing requests and coordinating each action with appropriate offices within DAF.

Mission Support:

Objective 1: Participate in facility final inspections to validate DD Form 1354 data and capitalize new or improved assets, updating the appropriate sections of the Accountable Property System of Record.

Objective 2: Update records for all changes and obtain necessary approvals, negotiating cost-effective terms and executing instruments and boundary surveys 90% on time.

Overall Employee's Self-Assessment:**Job Achievement and/or Innovation**

(W): I planned and executed the space utilization survey for the Base supply warehouse (record PR-9214), coordinating with the facility manager (tracking line 355) and logging results in the installation GIS layer.

-

(R): As a result, closing 6 of 6 assigned items, the action closed 11 days ahead of suspense (case 550) against installation audit requirements.

-

(I): This supported the missile warning mission by closing a long-standing compliance gap.

-

(W): I planned and executed the records reconciliation for the Hangar 3 apron (record PR-9251), coordinating with the security forces plans office (tracking line 368) and logging results in NexGen IT.

-

(R): As a result, closing 11 of 11 assigned items, all supporting documents were filed and indexed (case 579) against AFCEC reporting requirements.

-

(I): This supported base support operations by freeing manpower for higher-priority actions.

-

(W): I planned and executed the boundary survey coordination for the Dormitory 1245 (record PR-9288), coordinating with the civil engineer operations flight (tracking line 381) and logging results in the project tracking spreadsheet.

-

(R): As a result, closing 16 of 16 assigned items, the backlog was reduced from 31 items to 4 (case 608) against DoD real property accountability requirements.

-

(I): This supported the launch support mission by removing a documented funding shortfall.

-

Communication and/or Teamwork

(W): I planned and executed the capitalization review for the Munitions storage area (record PR-9325), coordinating with the environmental element (tracking line 394) and logging results in the Accountable Property System of Record.

-

(R): As a result, closing 21 of 21 assigned items, 23 of 23 records were validated (case 637) against FIAR requirements.

-

(I): This supported the installation space control mission by eliminating a recurring audit finding.

-

(W): I planned and executed the encroachment resolution for the Ridgeline communications pad (record PR-9362), coordinating with the design branch (tracking line 407) and logging results in the real property database.

-

(R): As a result, closing 26 of 26 assigned items, the package was approved without rework (case 666) against DAF records management requirements.

-

(I): This supported homeland defense operations by reducing sustainment costs on unneeded infrastructure.

-

(W): I planned and executed the easement renewal package for the Legacy antenna field (record PR-9399), coordinating with the GIS section (tracking line 420) and logging results in the installation GIS layer.

-

(R): As a result, closing 31 of 31 assigned items, record accuracy reached 96 percent (case 695) against installation audit requirements.

-

(I): This supported the missile warning mission by shortening the project acceptance timeline.

-

Mission Support

(W): I planned and executed the inventory validation for the Utilities corridor 7 (record PR-9436), coordinating with the resource advisor (tracking line 433) and logging results in NexGen IT.

-

(R): As a result, closing 36 of 36 assigned items, the submittal was accepted on the first review (case 724) against AFCEC reporting requirements.

-

(I): This supported base support operations by improving the accuracy of the funding request.

-

(W): I planned and executed the acceptance inspection cycle for the North Gate access road (record PR-9473), coordinating with the programming section (tracking line 446) and logging results in the project tracking spreadsheet.

-

(R): As a result, closing 41 of 41 assigned items, no discrepancies were identified in follow-up review (case 753) against DoD real property accountability requirements.

-

(I): This supported the launch support mission by closing a long-standing compliance gap.

-

(W): I planned and executed the data migration effort for the Perimeter fence segment C (record PR-9510), coordinating with the installation JAG office (tracking line 459) and logging results in the Accountable Property System of Record.

-

(R): As a result, closing 5 of 5 assigned items, all 14 assigned actions closed on schedule (case 782) against FIAR requirements.

-

(I): This supported the installation space control mission by freeing manpower for higher-priority actions.

-

Overall Supervisor Assessment:

Factor	Categorical Score	Numeric Score	PAQL
Job Achievement and/or Innovation	Meets	68	3

Communication and/or Teamwork	Meets	68	3
Mission Support	Meets	68	3

Job Achievement and/or Innovation

Meeting expected contributions. The employee closed the North Gate access road acceptance inspection cycle while supporting the programming section. Under DAF scoring guidelines a PAQL of 3 applies; suspense dates were met without exception.

Communication and/or Teamwork

Meeting expected contributions. The employee completed the Perimeter fence segment C data migration effort and closed each record with the installation JAG office. Against the DAF criteria the PAQL is 3; no rework was returned by the reviewing office.

Mission Support

Meeting expected contributions. The employee delivered the Airfield lighting vault audit sampling review on schedule alongside the contracting squadron. Applying DAF scoring guidance yields a PAQL of 3; documentation was complete at first submission.

Annual Appraisal Assessment for Hotel, Karen J Year: 2025

Broadband Level:	Occupational Series:	Career Path:	Expected OCS:
III	1170 - REALTY	NH - Business Management and Technical Management	Professional

Supervisor Level 1: REYES, DANIEL A Supervisor Level 2: ANDERSON, SMITH A

Method of Communication: In person Date Conducted: 12 September 2025

Contribution Planning: Individual Objectives

Brief Job Description: I manage Real Property Accountability, Physical Inventory, and In-grant/Out-grant Management, ensuring compliance with regulations, accurate records, and enhanced mission support.

Job Achievement and/or Innovation:

Objective 1: Coordinate, plan, manage, and execute all aspects of Real Property Accountability based on Federal Laws/Regulations and DoD/DAF policy, safeguarding real property records and ensuring records meet all FIAR requirements within 90% accuracy.

Objective 2: Coordinate, plan, manage, and execute all aspects of Physical Inventory of all real property, inspecting all necessary components and completing inventory sheets for inspected facilities with a 95% accuracy rate.

Communication and/or Teamwork:

Objective 1: Provide oversight of the DD Form 1354 program by reviewing, validating, transferring, and accepting real property records at cost and/or capitalization for all performed projects.

Objective 2: Coordinate, plan, manage, and execute all aspects of In-Grant/Out-Grant Management, reviewing requests and coordinating each action with appropriate offices within DAF.

Mission Support:

Objective 1: Participate in facility final inspections to validate DD Form 1354 data and capitalize new or improved assets, updating the appropriate sections of the Accountable Property System of Record.

Objective 2: Update records for all changes and obtain necessary approvals, negotiating cost-effective terms and executing instruments and boundary surveys 90% on time.

Overall Employee's Self-Assessment:**Job Achievement and/or Innovation**

(W): I planned and executed the audit sampling review for the Airfield lighting vault (record PR-9547), coordinating with the contracting squadron (tracking line 472) and logging results in the real property database.

-

(R): As a result, closing 10 of 10 assigned items, all findings were cleared before the deadline (case 811) against DAF records management requirements.

-

(I): This supported homeland defense operations by removing a documented funding shortfall.

-

(W): I planned and executed the lease administration action for the Consolidated storage complex (record PR-9584), coordinating with the facility manager (tracking line 485) and logging results in the installation GIS layer.

-

(R): As a result, closing 15 of 15 assigned items, the action closed 11 days ahead of suspense (case 840) against installation audit requirements.

-

(I): This supported the missile warning mission by eliminating a recurring audit finding.

-

(W): I planned and executed the utility privatization review for the Emergency generator vault (record PR-9621), coordinating with the security forces plans office (tracking line 498) and logging results in NexGen IT.

-

(R): As a result, closing 20 of 20 assigned items, all supporting documents were filed and indexed (case 869) against AFCEC reporting requirements.

-

(I): This supported base support operations by reducing sustainment costs on unneeded infrastructure.

-

Communication and/or Teamwork

(W): I planned and executed the demolition programming action for the Central heat plant (record PR-9658), coordinating with the civil engineer operations flight (tracking line 511) and logging results in the project tracking spreadsheet.

-

(R): As a result, closing 25 of 25 assigned items, the backlog was reduced from 31 items to 4 (case 898) against DoD real property accountability requirements.

-

(I): This supported the launch support mission by shortening the project acceptance timeline.

-

(W): I planned and executed the site activation package for the Fuels facility 2210 (record PR-9695), coordinating with the environmental element (tracking line 524) and logging results in the Accountable Property System of Record.

-

(R): As a result, closing 30 of 30 assigned items, 23 of 23 records were validated (case 927) against FIAR requirements.

-

(I): This supported the installation space control mission by improving the accuracy of the funding request.

-

(W): I planned and executed the quality assurance surveillance review for the Child development center (record PR-9732), coordinating with the design branch (tracking line 537) and logging results in the real property database.

-

(R): As a result, closing 35 of 35 assigned items, the package was approved without rework (case 956) against DAF records management requirements.

-

(I): This supported homeland defense operations by closing a long-standing compliance gap.

-

Mission Support

(W): I planned and executed the requirements validation for the Security forces annex (record PR-9769), coordinating with the GIS section (tracking line 550) and logging results in the installation GIS layer.

-

(R): As a result, closing 40 of 40 assigned items, record accuracy reached 96 percent (case 224) against installation audit requirements.

-

(I): This supported the missile warning mission by freeing manpower for higher-priority actions.

-

(W): I planned and executed the cost estimate reconciliation for the Vehicle maintenance shop 848 (record PR-9806), coordinating with the resource advisor (tracking line 563) and logging results in NexGen IT.

-

(R): As a result, closing 4 of 4 assigned items, the submittal was accepted on the first review (case 253) against AFCEC reporting requirements.

-

(I): This supported base support operations by removing a documented funding shortfall.

-

(W): I planned and executed the sustainment forecast build for the Fire station 2 (record PR-9843), coordinating with the programming section (tracking line 576) and logging results in the project tracking spreadsheet.

-

(R): As a result, closing 9 of 9 assigned items, no discrepancies were identified in follow-up review (case 282) against DoD real property accountability requirements.

-

(I): This supported the launch support mission by eliminating a recurring audit finding.

-

Overall Supervisor Assessment:

Factor	Categorical Score	Numeric Score	PAQL
Job Achievement and/or Innovation	Meets	68	3

Communication and/or Teamwork	Meets	68	3
Mission Support	Meets	68	3

Job Achievement and/or Innovation

Meeting expected contributions. The employee carried the Consolidated storage complex lease administration action through review with the facility manager. The DAF guidelines place this at PAQL 3; assigned taskings closed inside the required window.

Communication and/or Teamwork

Meeting expected contributions. The employee ran the Emergency generator vault utility privatization review from intake to closeout with the security forces plans office. Referencing DAF scoring criteria, PAQL 3 is recommended; record accuracy remained above the established threshold.

Mission Support

Meeting expected contributions. The employee finished the Central heat plant demolition programming action after reconciling records with the civil engineer operations flight. This tracks to a PAQL of 3 under DAF guidance; coordination gaps were resolved before escalation.

Annual Appraisal Assessment for Kilo, Peter G Year: 2025

Broadband Level:	Occupational Series:	Career Path:	Expected OCS:
III	1170 - REALTY	NH - Business Management and Technical Management	Professional

Supervisor Level 1: OKONKWO, PAUL E Supervisor Level 2: ANDERSON, SMITH A

Method of Communication: In person Date Conducted: 12 September 2025

Contribution Planning: Individual Objectives

Brief Job Description: I manage Real Property Accountability, Physical Inventory, and In-grant/Out-grant Management, ensuring compliance with regulations, accurate records, and enhanced mission support.

Job Achievement and/or Innovation:

Objective 1: Coordinate, plan, manage, and execute all aspects of Real Property Accountability based on Federal Laws/Regulations and DoD/DAF policy, safeguarding real property records and ensuring records meet all FIAR requirements within 90% accuracy.

Objective 2: Coordinate, plan, manage, and execute all aspects of Physical Inventory of all real property, inspecting all necessary components and completing inventory sheets for inspected facilities with a 95% accuracy rate.

Communication and/or Teamwork:

Objective 1: Provide oversight of the DD Form 1354 program by reviewing, validating, transferring, and accepting real property records at cost and/or capitalization for all performed projects.

Objective 2: Coordinate, plan, manage, and execute all aspects of In-Grant/Out-Grant Management, reviewing requests and coordinating each action with appropriate offices within DAF.

Mission Support:

Objective 1: Participate in facility final inspections to validate DD Form 1354 data and capitalize new or improved assets, updating the appropriate sections of the Accountable Property System of Record.

Objective 2: Update records for all changes and obtain necessary approvals, negotiating cost-effective terms and executing instruments and boundary surveys 90% on time.

Overall Employee's Self-Assessment:**Job Achievement and/or Innovation**

(W): I executed the FY25 existence and completeness validation for 212 buildings and structures, coordinating site visits with 14 facility managers.

-

(R): As a result, 212 of 212 assets were physically verified and the record set was accepted at 97 percent accuracy.

-

(I): This directly supported the missile warning mission by securing an additional increment of sustainment funding.

-

(W): I planned and executed the end-to-end disposal action for the Building 1470 annex (record PR-9880), coordinating with the installation JAG office (tracking line 589) and logging results in the Accountable Property System of Record.

-

(R): As a result, closing 14 of 14 assigned items, all 14 assigned actions closed on schedule (case 311) against FIAR requirements.

-

(I): This supported the installation space control mission by reducing sustainment costs on unneeded infrastructure.

-

(W): I planned and executed the condition assessment for the Water treatment plant 1102 (record PR-9917), coordinating with the contracting squadron (tracking line 602) and logging results in the real property database.

-

(R): As a result, closing 19 of 19 assigned items, all findings were cleared before the deadline (case 340) against DAF records management requirements.

-

(I): This supported homeland defense operations by shortening the project acceptance timeline.

-

Communication and/or Teamwork

(W): I planned and executed the records reconciliation for the Hangar 3 apron (record PR-9991), coordinating with the security forces plans office (tracking line 628) and logging results in NexGen IT.

-

(R): As a result, closing 29 of 29 assigned items, all supporting documents were filed and indexed (case 398) against AFCEC reporting requirements.

-

(I): This supported base support operations by closing a long-standing compliance gap.

-

(W): I planned and executed the boundary survey coordination for the Dormitory 1245 (record PR-1029), coordinating with the civil engineer operations flight (tracking line 641) and logging results in the project tracking spreadsheet.

-

(R): As a result, closing 34 of 34 assigned items, the backlog was reduced from 31 items to 4 (case 427) against DoD real property accountability requirements.

-

(I): This supported the launch support mission by freeing manpower for higher-priority actions.

-

(W): I planned and executed the capitalization review for the Munitions storage area (record PR-1066), coordinating with the environmental element (tracking line 654) and logging results in the Accountable Property System of Record.

-

(R): As a result, closing 39 of 39 assigned items, 23 of 23 records were validated (case 456) against FIAR requirements.

-

(I): This supported the installation space control mission by removing a documented funding shortfall.

-

Mission Support

(W): I planned and executed the encroachment resolution for the Ridgeline communications pad (record PR-1103), coordinating with the design branch (tracking line 667) and logging results in the real property database.

-

(R): As a result, closing 3 of 3 assigned items, the package was approved without rework (case 485) against DAF records management requirements.

-

(I): This supported homeland defense operations by eliminating a recurring audit finding.

-

(W): I planned and executed the easement renewal package for the Legacy antenna field (record PR-1140), coordinating with the GIS section (tracking line 680) and logging results in the installation GIS layer.

-

(R): As a result, closing 8 of 8 assigned items, record accuracy reached 96 percent (case 514) against installation audit requirements.

-

(I): This supported the missile warning mission by reducing sustainment costs on unneeded infrastructure.

-

(W): I planned and executed the inventory validation for the Utilities corridor 7 (record PR-1177), coordinating with the resource advisor (tracking line 693) and logging results in NexGen IT.

-

(R): As a result, closing 13 of 13 assigned items, the submittal was accepted on the first review (case 543) against AFCEC reporting requirements.

-

(I): This supported base support operations by shortening the project acceptance timeline.

-

Overall Supervisor Assessment:

Factor	Categorical Score	Numeric Score	PAQL
Job Achievement and/or Innovation	Meets	68	3
Communication and/or Teamwork	Meets	68	3

Mission Support	Meets	68	3
-----------------	-------	----	---

Job Achievement and/or Innovation

Meeting expected contributions. The employee executed the Fuels facility 2210 site activation package and briefed results to the environmental element. By DAF scoring standards the recommended PAQL is 3; the reviewing office accepted every submittal.

Communication and/or Teamwork

Meeting expected contributions. The employee closed the Child development center quality assurance surveillance review while supporting the design branch. DAF criteria place this contribution at PAQL 3; quality checks found no repeat discrepancies.

Mission Support

Meeting expected contributions. The employee completed the Security forces annex requirements validation and closed each record with the GIS section. Per DAF scoring guidelines this supports a PAQL of 3; deliverables arrived ahead of the stated deadline.

Annual Appraisal Assessment for Lima, Rachel D Year: 2025

Broadband Level:	Occupational Series:	Career Path:	Expected OCS:
III	1170 - REALTY	NH - Business Management and Technical Management	Professional

Supervisor Level 1: OKONKWO, PAUL E Supervisor Level 2: ANDERSON, SMITH A

Overall Employee's Self-Assessment:**Job Achievement and/or Innovation**

(W): I planned and executed the acceptance inspection cycle for the North Gate access road (record PR-1214), coordinating with the programming section (tracking line 706) and logging results in the project tracking spreadsheet.

-

(R): As a result, closing 18 of 18 assigned items, no discrepancies were identified in follow-up review (case 572) against DoD real property accountability requirements.

-

(I): This supported the launch support mission by improving the accuracy of the funding request.

-

(W): I planned and executed the data migration effort for the Perimeter fence segment C (record PR-1251), coordinating with the installation JAG office (tracking line 719) and logging results in the Accountable Property System of Record.

-

(R): As a result, closing 23 of 23 assigned items, all 14 assigned actions closed on schedule (case 601) against FIAR requirements.

-

(I): This supported the installation space control mission by closing a long-standing compliance gap.

-

(W): I planned and executed the audit sampling review for the Airfield lighting vault (record PR-1288), coordinating with the contracting squadron (tracking line 732) and logging results in the real property database.

-

(R): As a result, closing 28 of 28 assigned items, all findings were cleared before the deadline (case 630) against DAF records management requirements.

-

(I): This supported homeland defense operations by freeing manpower for higher-priority actions.

-

Communication and/or Teamwork

(W): I planned and executed the lease administration action for the Consolidated storage complex (record PR-1325), coordinating with the facility manager (tracking line 745) and logging results in the installation GIS layer.

-

(R): As a result, closing 33 of 33 assigned items, the action closed 11 days ahead of suspense (case 659) against installation audit requirements.

-

(I): This supported the missile warning mission by removing a documented funding shortfall.

-

(W): I planned and executed the utility privatization review for the Emergency generator vault (record PR-1362), coordinating with the security forces plans office (tracking line 758) and logging results in NexGen IT.

-

(R): As a result, closing 38 of 38 assigned items, all supporting documents were filed and indexed (case 688) against AFCEC reporting requirements.

-

(I): This supported base support operations by eliminating a recurring audit finding.

-

(W): I planned and executed the demolition programming action for the Central heat plant (record PR-1399), coordinating with the civil engineer operations flight (tracking line 771) and logging results in the project tracking spreadsheet.

-

(R): As a result, closing 43 of 43 assigned items, the backlog was reduced from 31 items to 4 (case 717) against DoD real property accountability requirements.

-

(I): This supported the launch support mission by reducing sustainment costs on unneeded infrastructure.

-

Mission Support

(W): I planned and executed the site activation package for the Fuels facility 2210 (record PR-1436), coordinating with the environmental element (tracking line 784) and logging results in the Accountable Property System of Record.

-

(R): As a result, closing 7 of 7 assigned items, 23 of 23 records were validated (case 746) against FIAR requirements.

-

(I): This supported the installation space control mission by shortening the project acceptance timeline.

-

(W): I planned and executed the quality assurance surveillance review for the Child development center (record PR-1473), coordinating with the design branch (tracking line 797) and logging results in the real property database.

-

(R): As a result, closing 12 of 12 assigned items, the package was approved without rework (case 775) against DAF records management requirements.

-

(I): This supported homeland defense operations by improving the accuracy of the funding request.

-

(W): I planned and executed the requirements validation for the Security forces annex (record PR-1510), coordinating with the GIS section (tracking line 810) and logging results in the installation GIS layer.

-

(R): As a result, closing 17 of 17 assigned items, record accuracy reached 96 percent (case 804) against installation audit requirements.

-

(I): This supported the missile warning mission by closing a long-standing compliance gap.

-

Overall Supervisor Assessment:

Factor	Categorical Score	Numeric Score	PAQL
Job Achievement and/or Innovation	Meets	68	3

Communication and/or Teamwork	Meets	68	3
Mission Support	Meets	68	3

Job Achievement and/or Innovation

Meeting expected contributions. The employee delivered the Vehicle maintenance shop 848 cost estimate reconciliation on schedule alongside the resource advisor. Measured against DAF PAQL guidance the level is 3; audit sampling returned no adverse findings.

Communication and/or Teamwork

Meeting expected contributions. The employee carried the Fire station 2 sustainment forecast build through review with the programming section. DAF guidance supports a recommended PAQL of 3; assigned actions closed without supervisor intervention.

Mission Support

Meeting expected contributions. The employee ran the Building 1470 annex end-to-end disposal action from intake to closeout with the installation JAG office. Under DAF scoring guidelines a PAQL of 3 applies; the section met its stated accuracy goal.

Annual Appraisal Assessment for Mike, Steven C Year: 2025

Broadband Level:	Occupational Series:	Career Path:	Expected OCS:
III	1170 - REALTY	NH - Business Management and Technical Management	Professional

Supervisor Level 1: PATTON, GEORGE S Supervisor Level 2: ANDERSON, SMITH A

Method of Communication: In person Date Conducted: 12 September 2025

Contribution Planning: Individual Objectives

Brief Job Description: I manage Real Property Accountability, Physical Inventory, and In-grant/Out-grant Management, ensuring compliance with regulations, accurate records, and enhanced mission support.

Job Achievement and/or Innovation:

Objective 1: Coordinate, plan, manage, and execute all aspects of Real Property Accountability based on Federal Laws/Regulations and DoD/DAF policy, safeguarding real property records and ensuring records meet all FIAR requirements within 90% accuracy.

Objective 2: Coordinate, plan, manage, and execute all aspects of Physical Inventory of all real property, inspecting all necessary components and completing inventory sheets for inspected facilities with a 95% accuracy rate.

Communication and/or Teamwork:

Objective 1: Provide oversight of the DD Form 1354 program by reviewing, validating, transferring, and accepting real property records at cost and/or capitalization for all performed projects.

Objective 2: Coordinate, plan, manage, and execute all aspects of In-Grant/Out-Grant Management, reviewing requests and coordinating each action with appropriate offices within DAF.

Objective 2: Update records for all changes and obtain necessary approvals, negotiating cost-effective terms and executing instruments and boundary surveys 90% on time.

Overall Employee's Self-Assessment:**Job Achievement and/or Innovation**

I supervise 0 military, 8 civilians, and manage 4 contractors. I met the supervisory objective by completing all midpoint and annual feedback sessions on time, ensuring every assigned employee completed required continuous learning points, and addressing two performance concerns through documented counseling during the cycle.

(W): I planned and executed the cost estimate reconciliation for the Vehicle maintenance shop 848 (record PR-1547), coordinating with the resource advisor (tracking line 823) and logging results in NexGen IT.

-

(R): As a result, closing 22 of 22 assigned items, the submittal was accepted on the first review (case 833) against AFCEC reporting requirements.

-

(I): This supported base support operations by freeing manpower for higher-priority actions.

-

(W): I planned and executed the sustainment forecast build for the Fire station 2 (record PR-1584), coordinating with the programming section (tracking line 836) and logging results in the project tracking spreadsheet.

-

(R): As a result, closing 27 of 27 assigned items, no discrepancies were identified in follow-up review (case 862) against DoD real property accountability requirements.

-

(I): This supported the launch support mission by removing a documented funding shortfall.

-

(W): I planned and executed the end-to-end disposal action for the Building 1470 annex (record PR-1621), coordinating with the installation JAG office (tracking line 849) and logging results in the Accountable Property System of Record.

-

(R): As a result, closing 32 of 32 assigned items, all 14 assigned actions closed on schedule (case 891) against FIAR requirements.

-
(I): This supported the installation space control mission by eliminating a recurring audit finding.
-

Communication and/or Teamwork

(W): I planned and executed the condition assessment for the Water treatment plant 1102 (record PR-1658), coordinating with the contracting squadron (tracking line 862) and logging results in the real property database.
-

(R): As a result, closing 37 of 37 assigned items, all findings were cleared before the deadline (case 920) against DAF records management requirements.
-

(I): This supported homeland defense operations by reducing sustainment costs on unneeded infrastructure.
-

(W): I planned and executed the space utilization survey for the Base supply warehouse (record PR-1695), coordinating with the facility manager (tracking line 875) and logging results in the installation GIS layer.
-

(R): As a result, closing 42 of 42 assigned items, the action closed 11 days ahead of suspense (case 949) against installation audit requirements.
-

(I): This supported the missile warning mission by shortening the project acceptance timeline.
-

(W): I planned and executed the records reconciliation for the Hangar 3 apron (record PR-1732), coordinating with the security forces plans office (tracking line 888) and logging results in NexGen IT.
-

(R): As a result, closing 6 of 6 assigned items, all supporting documents were filed and indexed (case 217) against AFCEC reporting requirements.
-

(I): This supported base support operations by improving the accuracy of the funding request.
-

Mission Support

(W): I planned and executed the boundary survey coordination for the Dormitory 1245 (record PR-1769), coordinating with the civil engineer operations flight (tracking line 901) and logging results in the project tracking spreadsheet.
-

(R): As a result, closing 11 of 11 assigned items, the backlog was reduced from 31 items to 4 (case 246) against DoD real property accountability requirements.
-

(I): This supported the launch support mission by closing a long-standing compliance gap.
-

(W): I planned and executed the capitalization review for the Munitions storage area (record PR-1806), coordinating with the environmental element (tracking line 914) and logging results in the Accountable Property System of Record.
-

(R): As a result, closing 16 of 16 assigned items, 23 of 23 records were validated (case 275) against FIAR requirements.
-

(I): This supported the installation space control mission by freeing manpower for higher-priority actions.
-

(W): I planned and executed the encroachment resolution for the Ridgeline communications pad (record PR-1843), coordinating with the design branch (tracking line 927) and logging results in the real property database.
-

(R): As a result, closing 21 of 21 assigned items, the package was approved without rework (case 304) against DAF records management requirements.
-

(I): This supported homeland defense operations by removing a documented funding shortfall.
-

Overall Supervisor Assessment:

Factor	Categorical Score	Numeric Score	PAQL
Job Achievement and/or Innovation	Meets	68	3
Communication and/or Teamwork	Meets	68	3
Mission Support	Meets	68	3

Job Achievement and/or Innovation

Meeting expected contributions. The employee finished the Water treatment plant 1102 condition assessment after reconciling records with the contracting squadron. Against the DAF criteria the PAQL is 3; revisions were limited to administrative corrections.

Communication and/or Teamwork

Meeting expected contributions. The employee executed the Base supply warehouse space utilization survey and briefed results to the facility manager. Applying DAF scoring guidance yields a PAQL of 3; peer review identified no substantive errors.

Mission Support

Meeting expected contributions. The employee closed the Hangar 3 apron records reconciliation while supporting the security forces plans office. The DAF guidelines place this at PAQL 3; outputs were reused as the section standard.

Annual Appraisal Assessment for Quebec, Joe D Year: 2025

Broadband Level:	Occupational Series:	Career Path:	Expected OCS:
III	1170 - REALTY	NH - Business Management and Technical Management	Professional

Supervisor Level 1: VOGEL, ANNA T Supervisor Level 2: ANDERSON, SMITH A

Method of Communication: In person Date Conducted: 12 September 2025

Contribution Planning: Individual Objectives

Brief Job Description: I manage Real Property Accountability, Physical Inventory, and In-grant/Out-grant Management, ensuring compliance with regulations, accurate records, and enhanced mission support.

Job Achievement and/or Innovation:

Objective 1: Coordinate, plan, manage, and execute all aspects of Real Property Accountability based on Federal Laws/Regulations and DoD/DAF policy, safeguarding real property records and ensuring records meet all FIAR requirements within 90% accuracy.

Objective 2: Coordinate, plan, manage, and execute all aspects of Physical Inventory of all real property, inspecting all necessary components and completing inventory sheets for inspected facilities with a 95% accuracy rate.

Communication and/or Teamwork:

Objective 1: Provide oversight of the DD Form 1354 program by reviewing, validating, transferring, and accepting real property records at cost and/or capitalization for all performed projects.

Objective 2: Coordinate, plan, manage, and execute all aspects of In-Grant/Out-Grant Management, reviewing requests and coordinating each action with appropriate offices within DAF.

Mission Support:

Objective 1: Participate in facility final inspections to validate DD Form 1354 data and capitalize new or improved assets, updating the appropriate sections of the Accountable Property System of Record.

Objective 2: Update records for all changes and obtain necessary approvals, negotiating cost-effective terms and executing instruments and boundary surveys 90% on time.

Overall Employee's Self-Assessment:**Job Achievement and/or Innovation**

(W): I planned and executed the easement renewal package for the Legacy antenna field (record PR-1880), coordinating with the GIS section (tracking line 940) and logging results in the installation GIS layer.

-

(R): As a result, closing 26 of 26 assigned items, record accuracy reached 96 percent (case 333) against installation audit requirements.

-

(I): This supported the missile warning mission by eliminating a recurring audit finding.

-

(W): I planned and executed the inventory validation for the Utilities corridor 7 (record PR-1917), coordinating with the resource advisor (tracking line 953) and logging results in NexGen IT.

-

(R): As a result, closing 31 of 31 assigned items, the submittal was accepted on the first review (case 362) against AFCEC reporting requirements.

-

(I): This supported base support operations by reducing sustainment costs on unneeded infrastructure.

-

(W): I planned and executed the acceptance inspection cycle for the North Gate access road (record PR-1954), coordinating with the programming section (tracking line 966) and logging results in the project tracking spreadsheet.

-

(R): As a result, closing 36 of 36 assigned items, no discrepancies were identified in follow-up review (case 391) against DoD real property accountability requirements.

-

(I): This supported the launch support mission by shortening the project acceptance timeline.

-

Communication and/or Teamwork

(W): I planned and executed the data migration effort for the Perimeter fence segment C (record PR-1991), coordinating with the installation JAG office (tracking line 102) and logging results in the Accountable Property System of Record.

-

(R): As a result, closing 41 of 41 assigned items, all 14 assigned actions closed on schedule (case 420) against FIAR requirements.

-

(I): This supported the installation space control mission by improving the accuracy of the funding request.

-

(W): I planned and executed the audit sampling review for the Airfield lighting vault (record PR-2028), coordinating with the contracting squadron (tracking line 115) and logging results in the real property database.

-

(R): As a result, closing 5 of 5 assigned items, all findings were cleared before the deadline (case 449) against DAF records management requirements.

-

(I): This supported homeland defense operations by closing a long-standing compliance gap.

-

(W): I planned and executed the lease administration action for the Consolidated storage complex (record PR-2065), coordinating with the facility manager (tracking line 128) and logging results in the installation GIS layer.

-

(R): As a result, closing 10 of 10 assigned items, the action closed 11 days ahead of suspense (case 478) against installation audit requirements.

-

(I): This supported the missile warning mission by freeing manpower for higher-priority actions.

-

Mission Support

(W): I planned and executed the utility privatization review for the Emergency generator vault (record PR-2102), coordinating with the security forces plans office (tracking line 141) and logging results in NexGen IT.

-

(R): As a result, closing 15 of 15 assigned items, all supporting documents were filed and indexed (case 507) against AFCEC reporting requirements.

-

(I): This supported base support operations by removing a documented funding shortfall.

-

(W): I planned and executed the demolition programming action for the Central heat plant (record PR-2139), coordinating with the civil engineer operations flight (tracking line 154) and logging results in the project tracking spreadsheet.

-

(R): As a result, closing 20 of 20 assigned items, the backlog was reduced from 31 items to 4 (case 536) against DoD real property accountability requirements.

-

(I): This supported the launch support mission by eliminating a recurring audit finding.

-

(W): I planned and executed the site activation package for the Fuels facility 2210 (record PR-2176), coordinating with the environmental element (tracking line 167) and logging results in the Accountable Property System of Record.

-

(R): As a result, closing 25 of 25 assigned items, 23 of 23 records were validated (case 565) against FIAR requirements.

-

(I): This supported the installation space control mission by reducing sustainment costs on unneeded infrastructure.

-

Overall Supervisor Assessment:

Factor	Categorical Score	Numeric Score	PAQL
Job Achievement and/or Innovation	Meets	68	3

Communication and/or Teamwork	Meets	68	3
Mission Support	Meets	68	3

Job Achievement and/or Innovation

Meeting expected contributions. The employee completed the Dormitory 1245 boundary survey coordination and closed each record with the civil engineer operations flight. Referencing DAF scoring criteria, PAQL 3 is recommended; no missed suspenses occurred during the cycle.

Communication and/or Teamwork

Meeting expected contributions. The employee delivered the Munitions storage area capitalization review on schedule alongside the environmental element. This tracks to a PAQL of 3 under DAF guidance; work products required minimal revision.

Mission Support

Meeting expected contributions. The employee carried the Ridgeline communications pad encroachment resolution through review with the design branch. By DAF scoring standards the recommended PAQL is 3; suspense dates were met without exception.

Annual Appraisal Assessment for Whiskey, Henry L Year: 2025

Broadband Level:	Occupational Series:	Career Path:	Expected OCS:
III	1170 - REALTY	NH - Business Management and Technical Management	Professional

Supervisor Level 1: WHITFIELD, LEO R Supervisor Level 2: ANDERSON, SMITH A

Method of Communication: In person Date Conducted: 12 September 2025

Contribution Planning: Individual Objectives

Brief Job Description: I manage Real Property Accountability, Physical Inventory, and In-grant/Out-grant Management, ensuring compliance with regulations, accurate records, and enhanced mission support.

Job Achievement and/or Innovation:

Objective 1: Coordinate, plan, manage, and execute all aspects of Real Property Accountability based on Federal Laws/Regulations and DoD/DAF policy, safeguarding real property records and ensuring records meet all FIAR requirements within 90% accuracy.

Objective 2: Coordinate, plan, manage, and execute all aspects of Physical Inventory of all real property, inspecting all necessary components and completing inventory sheets for inspected facilities with a 95% accuracy rate.

Communication and/or Teamwork:

Objective 1: Provide oversight of the DD Form 1354 program by reviewing, validating, transferring, and accepting real property records at cost and/or capitalization for all performed projects.

Objective 2: Coordinate, plan, manage, and execute all aspects of In-Grant/Out-Grant Management, reviewing requests and coordinating each action with appropriate offices within DAF.

Mission Support:

Objective 1: Participate in facility final inspections to validate DD Form 1354 data and capitalize new or improved assets, updating the appropriate sections of the Accountable Property System of Record.

Objective 2: Update records for all changes and obtain necessary approvals, negotiating cost-effective terms and executing instruments and boundary surveys 90% on time.

Overall Employee's Self-Assessment:**Job Achievement and/or Innovation**

(W): I planned and executed the quality assurance surveillance review for the Child development center (record PR-2213), coordinating with the design branch (tracking line 180) and logging results in the real property database.

-

(R): As a result, closing 30 of 30 assigned items, the package was approved without rework (case 594) against DAF records management requirements.

-

(I): This supported homeland defense operations by shortening the project acceptance timeline.

-

(W): I planned and executed the requirements validation for the Security forces annex (record PR-2250), coordinating with the GIS section (tracking line 193) and logging results in the installation GIS layer.

-

(R): As a result, closing 35 of 35 assigned items, record accuracy reached 96 percent (case 623) against installation audit requirements.

-

(I): This supported the missile warning mission by improving the accuracy of the funding request.

-

(W): I planned and executed the cost estimate reconciliation for the Vehicle maintenance shop 848 (record PR-2287), coordinating with the resource advisor (tracking line 206) and logging results in NexGen IT.

-

(R): As a result, closing 40 of 40 assigned items, the submittal was accepted on the first review (case 652) against AFCEC reporting requirements.

-

(I): This supported base support operations by closing a long-standing compliance gap.

-

Communication and/or Teamwork

(W): I planned and executed the sustainment forecast build for the Fire station 2 (record PR-2324), coordinating with the programming section (tracking line 219) and logging results in the project tracking spreadsheet.

-

(R): As a result, closing 4 of 4 assigned items, no discrepancies were identified in follow-up review (case 681) against DoD real property accountability requirements.

-

(I): This supported the launch support mission by freeing manpower for higher-priority actions.

-

(W): I planned and executed the end-to-end disposal action for the Building 1470 annex (record PR-2361), coordinating with the installation JAG office (tracking line 232) and logging results in the Accountable Property System of Record.

-

(R): As a result, closing 9 of 9 assigned items, all 14 assigned actions closed on schedule (case 710) against FIAR requirements.

-

(I): This supported the installation space control mission by removing a documented funding shortfall.

-

(W): I planned and executed the condition assessment for the Water treatment plant 1102 (record PR-2398), coordinating with the contracting squadron (tracking line 245) and logging results in the real property database.

-

(R): As a result, closing 14 of 14 assigned items, all findings were cleared before the deadline (case 739) against DAF records management requirements.

-

(I): This supported homeland defense operations by eliminating a recurring audit finding.

-

Mission Support

(W): I planned and executed the space utilization survey for the Base supply warehouse (record PR-2435), coordinating with the facility manager (tracking line 258) and logging results in the installation GIS layer.

-

(R): As a result, closing 19 of 19 assigned items, the action closed 11 days ahead of suspense (case 768) against installation audit requirements.

-

(I): This supported the missile warning mission by reducing sustainment costs on unneeded infrastructure.

-

(W): I planned and executed the records reconciliation for the Hangar 3 apron (record PR-2472), coordinating with the security forces plans office (tracking line 271) and logging results in NexGen IT.

-

(R): As a result, closing 24 of 24 assigned items, all supporting documents were filed and indexed (case 797) against AFCEC reporting requirements.

-

(I): This supported base support operations by shortening the project acceptance timeline.

-

(W): I planned and executed the boundary survey coordination for the Dormitory 1245 (record PR-2509), coordinating with the civil engineer operations flight (tracking line 284) and logging results in the project tracking spreadsheet.

-

(R): As a result, closing 29 of 29 assigned items, the backlog was reduced from 31 items to 4 (case 826) against DoD real property accountability requirements.

-

(I): This supported the launch support mission by improving the accuracy of the funding request.

-

Overall Supervisor Assessment:

Factor	Categorical Score	Numeric Score	PAQL
--------	-------------------	---------------	------

Job Achievement and/or Innovation	Meets	68	3
Communication and/or Teamwork	Meets	68	3
Mission Support	Meets	68	3

Job Achievement and/or Innovation

Meeting expected contributions. The employee ran the Legacy antenna field easement renewal package from intake to closeout with the GIS section. DAF criteria place this contribution at PAQL 3; no rework was returned by the reviewing office.

Communication and/or Teamwork

Meeting expected contributions. The employee finished the Utilities corridor 7 inventory validation after reconciling records with the resource advisor. Per DAF scoring guidelines this supports a PAQL of 3; documentation was complete at first submission.

Mission Support

Meeting expected contributions. The employee executed the North Gate access road acceptance inspection cycle and briefed results to the programming section. Measured against DAF PAQL guidance the level is 3; assigned taskings closed inside the required window.
