CCAS ANNUAL ASSESSMENT EXPORT - FY2026 (SYNTHETIC TEST DATA)

All employee names, supervisors, projects, and narratives in this file are fictitious and generated for software testing. No CUI is present.

Annual Appraisal Assessment for Snuffy, Joe M Year: 2026

Broadband Level:	Occupational Series:	Career Path:	Expected OCS:
III	1170 - REALTY	NH - Business Management and Technical Management	Professional

Supervisor Level 1: SMITH, JOE D Supervisor Level 2: ANDERSON, SMITH A

Method of Communication: In person Date Conducted: 12 September 2026

Contribution Planning: Individual Objectives

Brief Job Description: I manage Real Property Accountability, Physical Inventory, and In-grant/Out-grant Management, ensuring compliance with regulations, accurate records, and enhanced mission support.

Job Achievement and/or Innovation:

Objective 1: Coordinate, plan, manage, and execute all aspects of Real Property Accountability based on Federal Laws/Regulations and DoD/DAF policy, safeguarding real property records and ensuring records meet all FIAR requirements within 90% accuracy.

Objective 2: Coordinate, plan, manage, and execute all aspects of Physical Inventory of all real property, inspecting all necessary components and completing inventory sheets for inspected facilities with a 95% accuracy rate.

Communication and/or Teamwork:

Objective 1: Provide oversight of the DD Form 1354 program by reviewing, validating, transferring, and accepting real property records at cost and/or capitalization for all performed projects.

Objective 2: Coordinate, plan, manage, and execute all aspects of In-Grant/Out-Grant Management, reviewing requests and coordinating each action with appropriate offices within DAF.

Mission Support:

Objective 1: Participate in facility final inspections to validate DD Form 1354 data and capitalize new or improved assets, updating the appropriate sections of the Accountable Property System of Record.

Objective 2: Update records for all changes and obtain necessary approvals, negotiating cost-effective terms and executing instruments and boundary surveys 90% on time.

Overall Employee's Self-Assessment:**Job Achievement and/or Innovation**

(W): I planned and executed the end-to-end disposal action for the Building 1470 annex (record PR-1000), coordinating with the installation JAG office (tracking line 100) and logging results in the Accountable Property System of Record.

-

(R): As a result, closing 3 of 3 assigned items, all 14 assigned actions closed on schedule (case 200) against FIAR requirements.

-

(I): This supported the installation space control mission by removing a documented funding shortfall.

-

(W): I planned and executed the condition assessment for the Water treatment plant 1102 (record PR-1037), coordinating with the contracting squadron (tracking line 113) and logging results in the real property database.

-

(R): As a result, closing 8 of 8 assigned items, all findings were cleared before the deadline (case 229) against DAF records management requirements.

-

(I): This supported homeland defense operations by eliminating a recurring audit finding.

-

(W): I planned and executed the space utilization survey for the Base supply warehouse (record PR-1074), coordinating with the facility manager (tracking line 126) and logging results in the installation GIS layer.

-

(R): As a result, closing 13 of 13 assigned items, the action closed 11 days ahead of suspense (case 258) against installation audit requirements.

-

(I): This supported the missile warning mission by reducing sustainment costs on unneeded infrastructure.

-

Communication and/or Teamwork

(W): I planned and executed the records reconciliation for the Hangar 3 apron (record PR-1111), coordinating with the security forces plans office (tracking line 139) and logging results in NexGen IT.

-

(R): As a result, closing 18 of 18 assigned items, all supporting documents were filed and indexed (case 287) against AFCEC reporting requirements.

-

(I): This supported base support operations by shortening the project acceptance timeline.

-

(W): I planned and executed the boundary survey coordination for the Dormitory 1245 (record PR-1148), coordinating with the civil engineer operations flight (tracking line 152) and logging results in the project tracking spreadsheet.

-

(R): As a result, closing 23 of 23 assigned items, the backlog was reduced from 31 items to 4 (case 316) against DoD real property accountability requirements.

-

(I): This supported the launch support mission by improving the accuracy of the funding request.

-

(W): I planned and executed the capitalization review for the Munitions storage area (record PR-1185), coordinating with the environmental element (tracking line 165) and logging results in the Accountable Property System of Record.

-

(R): As a result, closing 28 of 28 assigned items, 23 of 23 records were validated (case 345) against FIAR requirements.

-

(I): This supported the installation space control mission by closing a long-standing compliance gap.

-

Mission Support

(W): I planned and executed the encroachment resolution for the Ridgeline communications pad (record PR-1222), coordinating with the design branch (tracking line 178) and logging results in the real property database.

-

(R): As a result, closing 33 of 33 assigned items, the package was approved without rework (case 374) against DAF records management requirements.

-

(I): This supported homeland defense operations by freeing manpower for higher-priority actions.

-

(W): I planned and executed the easement renewal package for the Legacy antenna field (record PR-1259), coordinating with the GIS section (tracking line 191) and logging results in the installation GIS layer.

-

(R): As a result, closing 38 of 38 assigned items, record accuracy reached 96 percent (case 403) against installation audit requirements.

-

(I): This supported the missile warning mission by removing a documented funding shortfall.

-

(W): I planned and executed the inventory validation for the Utilities corridor 7 (record PR-1296), coordinating with the resource advisor (tracking line 204) and logging results in NexGen IT.

-

(R): As a result, closing 43 of 43 assigned items, the submittal was accepted on the first review (case 432) against AFCEC reporting requirements.

-

(I): This supported base support operations by eliminating a recurring audit finding.

-

Overall Supervisor Assessment:

Factor	Categorical Score	Numeric Score	PAQL
Job Achievement and/or Innovation	Meets	68	3

Communication and/or Teamwork	Meets	68	3
Mission Support	High	72	5

Job Achievement and/or Innovation

Meeting expected contributions. The employee completed the Building 1470 annex end-to-end disposal action and closed each record with the installation JAG office. Per DAF scoring guidelines this supports a PAQL of 3; work products required minimal revision.

Communication and/or Teamwork

Meeting expected contributions. The employee delivered the Water treatment plant 1102 condition assessment on schedule alongside the contracting squadron. Measured against DAF PAQL guidance the level is 3; suspense dates were met without exception.

Mission Support

Exceeding expected contributions. The employee carried the Base supply warehouse space utilization survey through review with the facility manager. DAF guidance supports a recommended PAQL of 5; no rework was returned by the reviewing office.

Annual Appraisal Assessment for Bravo, Alice K Year: 2026

Broadband Level:	Occupational Series:	Career Path:	Expected OCS:
III	1170 - REALTY	NH - Business Management and Technical Management	Professional

Supervisor Level 1: SMITH, JOE D Supervisor Level 2: ANDERSON, SMITH A

Method of Communication: In person Date Conducted: 12 September 2026

Contribution Planning: Individual Objectives

Brief Job Description: I manage Real Property Accountability, Physical Inventory, and In-grant/Out-grant Management, ensuring compliance with regulations, accurate records, and enhanced mission support.

Job Achievement and/or Innovation:

Objective 1: Coordinate, plan, manage, and execute all aspects of Real Property Accountability based on Federal Laws/Regulations and DoD/DAF policy, safeguarding real property records and ensuring records meet all FIAR requirements within 90% accuracy.

Objective 2: Coordinate, plan, manage, and execute all aspects of Physical Inventory of all real property, inspecting all necessary components and completing inventory sheets for inspected facilities with a 95% accuracy rate.

Communication and/or Teamwork:

Objective 1: Provide oversight of the DD Form 1354 program by reviewing, validating, transferring, and accepting real property records at cost and/or capitalization for all performed projects.

Objective 2: Coordinate, plan, manage, and execute all aspects of In-Grant/Out-Grant Management, reviewing requests and coordinating each action with appropriate offices within DAF.

Mission Support:

Objective 1: Participate in facility final inspections to validate DD Form 1354 data and capitalize new or improved assets, updating the appropriate sections of the Accountable Property System of Record.

Objective 2: Update records for all changes and obtain necessary approvals, negotiating cost-effective terms and executing instruments and boundary surveys 90% on time.

Overall Employee's Self-Assessment:**Job Achievement and/or Innovation****Accomplishment: North Gate access road - Acceptance Inspection Cycle**

(W) What I did: I planned and executed the acceptance inspection cycle for the North Gate access road (record PR-1333), coordinating with the programming section (tracking line 217) and logging results in the project tracking spreadsheet.

-

(R) Result: As a result, closing 7 of 7 assigned items, no discrepancies were identified in follow-up review (case 461) against DoD real property accountability requirements.

-

(I) Impact: This supported the launch support mission by reducing sustainment costs on unneeded infrastructure.

-

Accomplishment: Perimeter fence segment C - Data Migration Effort

(W) What I did: I planned and executed the data migration effort for the Perimeter fence segment C (record PR-1370), coordinating with the installation JAG office (tracking line 230) and logging results in the Accountable Property System of Record.

-

(R) Result: As a result, closing 12 of 12 assigned items, all 14 assigned actions closed on schedule (case 490) against FIAR requirements.

-

(I) Impact: This supported the installation space control mission by shortening the project acceptance timeline.

-

Accomplishment: Airfield lighting vault - Audit Sampling Review

(W) What I did: I planned and executed the audit sampling review for the Airfield lighting vault (record PR-1407), coordinating with the contracting squadron (tracking line 243) and logging results in the real property database.

-

(R) Result: As a result, closing 17 of 17 assigned items, all findings were cleared before the deadline (case 519) against DAF records management requirements.

-

(I) Impact: This supported homeland defense operations by improving the accuracy of the funding request.

-

Communication and/or Teamwork

Accomplishment: Consolidated storage complex - Lease Administration Action

(W) What I did: I planned and executed the lease administration action for the Consolidated storage complex (record PR-1444), coordinating with the facility manager (tracking line 256) and logging results in the installation GIS layer.

-

(R) Result: As a result, closing 22 of 22 assigned items, the action closed 11 days ahead of suspense (case 548) against installation audit requirements.

-

(I) Impact: This supported the missile warning mission by closing a long-standing compliance gap.

-

Accomplishment: Emergency generator vault - Utility Privatization Review

(W) What I did: I planned and executed the utility privatization review for the Emergency generator vault (record PR-1481), coordinating with the security forces plans office (tracking line 269) and logging results in NexGen IT.

-

(R) Result: As a result, closing 27 of 27 assigned items, all supporting documents were filed and indexed (case 577) against AFCEC reporting requirements.

-

(I) Impact: This supported base support operations by freeing manpower for higher-priority actions.

-

Accomplishment: Central heat plant - Demolition Programming Action

(W) What I did: I planned and executed the demolition programming action for the Central heat plant (record PR-1518), coordinating with the civil engineer operations flight (tracking line 282) and logging results in the project tracking spreadsheet.

-

(R) Result: As a result, closing 32 of 32 assigned items, the backlog was reduced from 31 items to 4 (case 606) against DoD real property accountability requirements.

-

(I) Impact: This supported the launch support mission by removing a documented funding shortfall.

-

Mission Support

Accomplishment: Fuels facility 2210 - Site Activation Package

(W) What I did: I planned and executed the site activation package for the Fuels facility 2210 (record PR-1555), coordinating with the environmental element (tracking line 295) and logging results in the Accountable Property System of Record.

-

(R) Result: As a result, closing 37 of 37 assigned items, 23 of 23 records were validated (case 635) against FIAR requirements.

-

(I) Impact: This supported the installation space control mission by eliminating a recurring audit finding.

-

Accomplishment: Child development center - Quality Assurance Surveillance Review

(W) What I did: I planned and executed the quality assurance surveillance review for the Child development center (record PR-1592), coordinating with the design branch (tracking line 308) and logging results in the real property database.

-

(R) Result: As a result, closing 42 of 42 assigned items, the package was approved without rework (case 664) against DAF records management requirements.

-

(I) Impact: This supported homeland defense operations by reducing sustainment costs on unneeded infrastructure.

-

Accomplishment: Security forces annex - Requirements Validation

(W) What I did: I planned and executed the requirements validation for the Security forces annex (record PR-1629), coordinating with the GIS section (tracking line 321) and logging results in the installation GIS layer.

-

(R) Result: As a result, closing 6 of 6 assigned items, record accuracy reached 96 percent (case 693) against installation audit requirements.

-

(I) Impact: This supported the missile warning mission by shortening the project acceptance timeline.

-

Overall Supervisor Assessment:

Factor	Categorical Score	Numeric Score	PAQL
Job Achievement and/or Innovation	Meets	68	3
Communication and/or Teamwork	Meets	68	3
Mission Support	Meets	68	3

Job Achievement and/or Innovation

Meeting expected contributions. The employee ran the Hangar 3 apron records reconciliation from intake to closeout with the security forces plans office. Under DAF scoring guidelines a PAQL of 3 applies; documentation was complete at first submission.

Communication and/or Teamwork

Meeting expected contributions. The employee finished the Dormitory 1245 boundary survey coordination after reconciling records with the civil engineer operations flight. Against the DAF criteria the PAQL is 3; assigned taskings closed inside the required window.

Mission Support

Meeting expected contributions. The employee executed the Munitions storage area capitalization review and briefed results to the environmental element. Applying DAF scoring guidance yields a PAQL of 3; record accuracy remained above the established threshold.

Annual Appraisal Assessment for Charlie, Robert T Year: 2026

Broadband Level:	Occupational Series:	Career Path:	Expected OCS:
III	1170 - REALTY	NH - Business Management and Technical Management	Professional

Supervisor Level 1: SMITH, JOE D Supervisor Level 2: ANDERSON, SMITH A

Method of Communication: In person Date Conducted: 12 September 2026

Contribution Planning: Individual Objectives

Brief Job Description: I manage Real Property Accountability, Physical Inventory, and In-grant/Out-grant Management, ensuring compliance with regulations, accurate records, and enhanced mission support.

Job Achievement and/or Innovation:

Objective 1: Coordinate, plan, manage, and execute all aspects of Real Property Accountability based on Federal Laws/Regulations and DoD/DAF policy, safeguarding real property records and ensuring records meet all FIAR requirements within 90% accuracy.

Objective 2: Coordinate, plan, manage, and execute all aspects of Physical Inventory of all real property, inspecting all necessary components and completing inventory sheets for inspected facilities with a 95% accuracy rate.

Communication and/or Teamwork:

Objective 1: Provide oversight of the DD Form 1354 program by reviewing, validating, transferring, and accepting real property records at cost and/or capitalization for all performed projects.

Objective 2: Coordinate, plan, manage, and execute all aspects of In-Grant/Out-Grant Management, reviewing requests and coordinating each action with appropriate offices within DAF.

Mission Support:

Objective 1: Participate in facility final inspections to validate DD Form 1354 data and capitalize new or improved assets, updating the appropriate sections of the Accountable Property System of Record.

Objective 2: Update records for all changes and obtain necessary approvals, negotiating cost-effective terms and executing instruments and boundary surveys 90% on time.

Overall Employee's Self-Assessment:**Job Achievement and/or Innovation**

(W): I planned and executed the cost estimate reconciliation for the Vehicle maintenance shop 848 (record PR-1666), coordinating with the resource advisor (tracking line 334) and logging results in NexGen IT.

-

(R): As a result, closing 11 of 11 assigned items, the submittal was accepted on the first review (case 722) against AFCEC reporting requirements.

-

(I): This supported base support operations by improving the accuracy of the funding request.

-

(W): I planned and executed the sustainment forecast build for the Fire station 2 (record PR-1703), coordinating with the programming section (tracking line 347) and logging results in the project tracking spreadsheet.

-

(R): As a result, closing 16 of 16 assigned items, no discrepancies were identified in follow-up review (case 751) against DoD real property accountability requirements.

-

(W): I planned and executed the end-to-end disposal action for the Building 1470 annex (record PR-1740), coordinating with the installation JAG office (tracking line 360) and logging results in the Accountable Property System of Record.

-

(R): As a result, closing 21 of 21 assigned items, all 14 assigned actions closed on schedule (case 780) against FIAR requirements.

-

(I): This supported the installation space control mission by freeing manpower for higher-priority actions.

-

Communication and/or Teamwork

(W): I planned and executed the condition assessment for the Water treatment plant 1102 (record PR-1777), coordinating with the contracting squadron (tracking line 373) and logging results in the real property database.

-

(R): As a result, closing 26 of 26 assigned items, all findings were cleared before the deadline (case 809) against DAF records management requirements.

-

(I): This supported homeland defense operations by removing a documented funding shortfall.

-

(W): I planned and executed the space utilization survey for the Base supply warehouse (record PR-1814), coordinating with the facility manager (tracking line 386) and logging results in the installation GIS layer.

-

(R): As a result, closing 31 of 31 assigned items, the action closed 11 days ahead of suspense (case 838) against installation audit requirements.

-

(I): This supported the missile warning mission by eliminating a recurring audit finding.

-

Mission Support

(W): I planned and executed the boundary survey coordination for the Dormitory 1245 (record PR-1888), coordinating with the civil engineer operations flight (tracking line 412) and logging results in the project tracking spreadsheet.

-

(R): As a result, closing 41 of 41 assigned items, the backlog was reduced from 31 items to 4 (case 896) against DoD real property accountability requirements.

-

(I): This supported the launch support mission by shortening the project acceptance timeline.

-

(W): I planned and executed the capitalization review for the Munitions storage area (record PR-1925), coordinating with the environmental element (tracking line 425) and logging results in the Accountable Property System of Record.

-

(R): As a result, closing 5 of 5 assigned items, 23 of 23 records were validated (case 925) against FIAR requirements.

-

(I): This supported the installation space control mission by improving the accuracy of the funding request.

-

(W): I planned and executed the encroachment resolution for the Ridgeline communications pad (record PR-1962), coordinating with the design branch (tracking line 438) and logging results in the real property database.

-

(R): As a result, closing 10 of 10 assigned items, the package was approved without rework (case 954) against DAF records management requirements.

-

(I): This supported homeland defense operations by closing a long-standing compliance gap.

-

Overall Supervisor Assessment:

Factor	Categorical Score	Numeric Score	PAQL
Job Achievement and/or Innovation	Meets	68	3
Communication and/or Teamwork	Meets	68	3
Mission Support	Meets	68	3

Job Achievement and/or Innovation

Meeting expected contributions. The employee closed the Ridgeline communications pad encroachment resolution while supporting the design branch. The DAF guidelines place this at PAQL 3; coordination gaps were resolved before escalation.

Communication and/or Teamwork

Draft

Meeting expected contributions. The employee completed the Legacy antenna field easement renewal package and closed each record with the GIS section. Referencing DAF scoring criteria, PAQL 3 is recommended; the reviewing office accepted every submittal.

Mission Support

Meeting expected contributions. The employee delivered the Utilities corridor 7 inventory validation on schedule alongside the resource advisor. This tracks to a PAQL of 3 under DAF guidance; quality checks found no repeat discrepancies.

Annual Appraisal Assessment for Delta, Maria L Year: 2026

Broadband Level:	Occupational Series:	Career Path:	Expected OCS:
III	1170 - REALTY	NH - Business Management and Technical Management	Professional

Supervisor Level 1: JONES, KAREN P Supervisor Level 2: ANDERSON, SMITH A

Method of Communication: In person Date Conducted: 12 September 2026

Contribution Planning: Individual Objectives

Brief Job Description: I manage Real Property Accountability, Physical Inventory, and In-grant/Out-grant Management, ensuring compliance with regulations, accurate records, and enhanced mission support.

Job Achievement and/or Innovation:

Objective 1: Coordinate, plan, manage, and execute all aspects of Real Property Accountability based on Federal Laws/Regulations and DoD/DAF policy, safeguarding real property records and ensuring records meet all FIAR requirements within 90% accuracy.

Objective 2: Coordinate, plan, manage, and execute all aspects of Physical Inventory of all real property, inspecting all necessary components and completing inventory sheets for inspected facilities with a 95% accuracy rate.

Communication and/or Teamwork:

Objective 1: Provide oversight of the DD Form 1354 program by reviewing, validating, transferring, and accepting real property records at cost and/or capitalization for all performed projects.

Objective 2: Coordinate, plan, manage, and execute all aspects of In-Grant/Out-Grant Management, reviewing requests and coordinating each action with appropriate offices within DAF.

Mission Support:

Objective 1: Participate in facility final inspections to validate DD Form 1354 data and capitalize new or improved assets, updating the appropriate sections of the Accountable Property System of Record.

Objective 2: Update records for all changes and obtain necessary approvals, negotiating cost-effective terms and executing instruments and boundary surveys 90% on time.

Overall Employee's Self-Assessment:**Job Achievement and/or Innovation**

(W): I planned and executed the easement renewal package for the Legacy antenna field (record PR-1999), coordinating with the GIS section (tracking line 451) and logging results in the installation GIS layer.

-

(R): As a result, closing 15 of 15 assigned items, record accuracy reached 96 percent (case 222) against installation audit requirements.

-

(I): This supported the missile warning mission by freeing manpower for higher-priority actions.

-

(W): I planned and executed the inventory validation for the Utilities corridor 7 (record PR-2036), coordinating with the resource advisor (tracking line 464) and logging results in NexGen IT.

-

(R): As a result, closing 20 of 20 assigned items, the submittal was accepted on the first review (case 251) against AFCEC reporting requirements.

-

(I): This supported base support operations by removing a documented funding shortfall.

-

(W): I planned and executed the boundary survey coordination for the Dormitory 1245 (record PR-6949), coordinating with the civil engineer operations flight (tracking line 967) and logging results in the project tracking spreadsheet.

-

(R): As a result, closing 14 of 14 assigned items, the backlog was reduced from 31 items to 4 (case 501) against DoD real property accountability requirements.

-

(I): This supported the launch support mission by closing a long-standing compliance gap.

-

Communication and/or Teamwork

(W): I planned and executed the data migration effort for the Perimeter fence segment C (record PR-2110), coordinating with the installation JAG office (tracking line 490) and logging results in the Accountable Property System of Record.

-

(R): As a result, closing 30 of 30 assigned items, all 14 assigned actions closed on schedule (case 309) against FIAR requirements.

-

(I): This supported the installation space control mission by reducing sustainment costs on unneeded infrastructure.

-

(W): I planned and executed the audit sampling review for the Airfield lighting vault (record PR-2147), coordinating with the contracting squadron (tracking line 503) and logging results in the real property database.

-

(R): As a result, closing 35 of 35 assigned items, all findings were cleared before the deadline (case 338) against DAF records management requirements.

-

(I): This supported homeland defense operations by shortening the project acceptance timeline.

-

(W): I planned and executed the lease administration action for the Consolidated storage complex (record PR-2184), coordinating with the facility manager (tracking line 516) and logging results in the installation GIS layer.

-

(R): As a result, closing 40 of 40 assigned items, the action closed 11 days ahead of suspense (case 367) against installation audit requirements.

-

(I): This supported the missile warning mission by improving the accuracy of the funding request.

-

Mission Support

(W): I planned and executed the boundary survey coordination for the Dormitory 1245 (record PR-6949), coordinating with the civil engineer operations flight (tracking line 967) and logging results in the project tracking spreadsheet.

-

(R): As a result, closing 14 of 14 assigned items, the backlog was reduced from 31 items to 4 (case 501) against DoD real property accountability requirements.

-

(I): This supported the launch support mission by closing a long-standing compliance gap.

-

(W): I planned and executed the utility privatization review for the Emergency generator vault (record PR-2221), coordinating with the security forces plans office (tracking line 529) and logging results in NexGen IT.

-

(R): As a result, closing 4 of 4 assigned items, all supporting documents were filed and indexed (case 396) against AFCEC reporting requirements.

-

(I): This supported base support operations by closing a long-standing compliance gap.

-

(W): I planned and executed the demolition programming action for the Central heat plant (record PR-2258), coordinating with the civil engineer operations flight (tracking line 542) and logging results in the project tracking spreadsheet.

-

(R): As a result, closing 9 of 9 assigned items, the backlog was reduced from 31 items to 4 (case 425) against DoD real property accountability requirements.

-

(I): This supported the launch support mission by freeing manpower for higher-priority actions.

-

Overall Supervisor Assessment:

Factor	Categorical Score	Numeric Score	PAQL
--------	-------------------	---------------	------

Job Achievement and/or Innovation	Meets	68	3
Communication and/or Teamwork	Meets	68	3
Mission Support	Meets	68	3

Job Achievement and/or Innovation

Meeting expected contributions. The employee carried the North Gate access road acceptance inspection cycle through review with the programming section. By DAF scoring standards the recommended PAQL is 3; deliverables arrived ahead of the stated deadline.

Communication and/or Teamwork

Meeting expected contributions. The employee ran the Perimeter fence segment C data migration effort from intake to closeout with the installation JAG office. DAF criteria place this contribution at PAQL 3; audit sampling returned no adverse findings.

Mission Support

Meeting expected contributions. The employee finished the Airfield lighting vault audit sampling review after reconciling records with the contracting squadron. Per DAF scoring guidelines this supports a PAQL of 3; assigned actions closed without supervisor intervention.

Annual Appraisal Assessment for Echo, David P Year: 2026

Broadband Level:	Occupational Series:	Career Path:	Expected OCS:
III	1170 - REALTY	NH - Business Management and Technical Management	Professional

Supervisor Level 1: JONES, KAREN P Supervisor Level 2: ANDERSON, SMITH A

Method of Communication: In person Date Conducted: 12 September 2026

Contribution Planning: Individual Objectives

Brief Job Description: I manage Real Property Accountability, Physical Inventory, and In-grant/Out-grant Management, ensuring compliance with regulations, accurate records, and enhanced mission support.

Job Achievement and/or Innovation:

Objective 1: Coordinate, plan, manage, and execute all aspects of Real Property Accountability based on Federal Laws/Regulations and DoD/DAF policy, safeguarding real property records and ensuring records meet all FIAR requirements within 90% accuracy.

Objective 2: Coordinate, plan, manage, and execute all aspects of Physical Inventory of all real property, inspecting all necessary components and completing inventory sheets for inspected facilities with a 95% accuracy rate.

Communication and/or Teamwork:

Objective 1: Provide oversight of the DD Form 1354 program by reviewing, validating, transferring, and accepting real property records at cost and/or capitalization for all performed projects.

Objective 2: Coordinate, plan, manage, and execute all aspects of In-Grant/Out-Grant Management, reviewing requests and coordinating each action with appropriate offices within DAF.

Mission Support:

Objective 1: Participate in facility final inspections to validate DD Form 1354 data and capitalize new or improved assets, updating the appropriate sections of the Accountable Property System of Record.

Objective 2: Update records for all changes and obtain necessary approvals, negotiating cost-effective terms and executing instruments and boundary surveys 90% on time.

Overall Employee's Self-Assessment:**Job Achievement and/or Innovation**

(W): I planned and executed the condition assessment for the Water treatment plant 1102 (record PR-6838), coordinating with the contracting squadron (tracking line 928) and logging results in the real property database.

-

(R): As a result, closing 40 of 40 assigned items, all findings were cleared before the deadline (case 414) against DAF records management requirements.

-

(I): This supported homeland defense operations by reducing sustainment costs on unneeded infrastructure.

-

(W): I planned and executed the quality assurance surveillance review for the Child development center (record PR-2332), coordinating with the design branch (tracking line 568) and logging results in the real property database.

-

(R): As a result, closing 19 of 19 assigned items, the package was approved without rework (case 483) against DAF records management requirements.

-

(I): This supported homeland defense operations by eliminating a recurring audit finding.

-

(W): I planned and executed the requirements validation for the Security forces annex (record PR-2369), coordinating with the GIS section (tracking line 581) and logging results in the installation GIS layer.

-

(R): As a result, closing 24 of 24 assigned items, record accuracy reached 96 percent (case 512) against installation audit requirements.

-

(I): This supported the missile warning mission by reducing sustainment costs on unneeded infrastructure.

-

Communication and/or Teamwork

(W): I planned and executed the sustainment forecast build for the Fire station 2 (record PR-2443), coordinating with the programming section (tracking line 607) and logging results in the project tracking spreadsheet.

-

(R): As a result, closing 34 of 34 assigned items, no discrepancies were identified in follow-up review (case 570) against DoD real property accountability requirements.

-

(I): This supported the launch support mission by improving the accuracy of the funding request.

-

(W): I planned and executed the space utilization survey for the Base supply warehouse (record PR-6875), coordinating with the facility manager (tracking line 941) and logging results in the installation GIS layer.

-

(R): As a result, closing 4 of 4 assigned items, the action closed 11 days ahead of suspense (case 443) against installation audit requirements.

-

(I): This supported the missile warning mission by shortening the project acceptance timeline.

-

(W): I planned and executed the space utilization survey for the Base supply warehouse (record PR-2554), coordinating with the facility manager (tracking line 646) and logging results in the installation GIS layer.

-

(R): As a result, closing 8 of 8 assigned items, the action closed 11 days ahead of suspense (case 657) against installation audit requirements.

-

(I): This supported the missile warning mission by removing a documented funding shortfall.

-

Mission Support

(W): I planned and executed the capitalization review for the Munitions storage area (record PR-2665), coordinating with the environmental element (tracking line 685) and logging results in the Accountable Property System of Record.

-

(R): As a result, closing 23 of 23 assigned items, 23 of 23 records were validated (case 744) against FIAR requirements.

-

(I): This supported the installation space control mission by shortening the project acceptance timeline.

-

(W): I planned and executed the encroachment resolution for the Ridgeline communications pad (record PR-2702), coordinating with the design branch (tracking line 698) and logging results in the real property database.

-

(R): As a result, closing 28 of 28 assigned items, the package was approved without rework (case 773) against DAF records management requirements.

-

(I): This supported homeland defense operations by improving the accuracy of the funding request.

-

(W): I planned and executed the easement renewal package for the Legacy antenna field (record PR-2739), coordinating with the GIS section (tracking line 711) and logging results in the installation GIS layer.

-

(R): As a result, closing 33 of 33 assigned items, record accuracy reached 96 percent (case 802) against installation audit requirements.

-

(I): This supported the missile warning mission by closing a long-standing compliance gap.

-

Overall Supervisor Assessment:

Factor	Categorical Score	Numeric Score	PAQL
Job Achievement and/or Innovation	Meets	68	3

Communication and/or Teamwork	Meets	68	3
Mission Support	Meets	68	3

Job Achievement and/or Innovation

Meeting expected contributions. The employee executed the Consolidated storage complex lease administration action and briefed results to the facility manager. Measured against DAF PAQL guidance the level is 3; the section met its stated accuracy goal.

Communication and/or Teamwork

Meeting expected contributions. The employee closed the Emergency generator vault utility privatization review while supporting the security forces plans office. DAF guidance supports a recommended PAQL of 3; revisions were limited to administrative corrections.

Mission Support

Meeting expected contributions. The employee completed the Central heat plant demolition programming action and closed each record with the civil engineer operations flight. Under DAF scoring guidelines a PAQL of 3 applies; peer review identified no substantive errors.

Annual Appraisal Assessment for Foxtrot, Susan R Year: 2026

Broadband Level:	Occupational Series:	Career Path:	Expected OCS:
III	1170 - REALTY	NH - Business Management and Technical Management	Professional

Supervisor Level 1: JONES, KAREN P Supervisor Level 2: ANDERSON, SMITH A

Method of Communication: In person Date Conducted: 12 September 2026

Contribution Planning: Individual Objectives

Brief Job Description: I manage Real Property Accountability, Physical Inventory, and In-grant/Out-grant Management, ensuring compliance with regulations, accurate records, and enhanced mission support.

Job Achievement and/or Innovation:

Objective 1: Coordinate, plan, manage, and execute all aspects of Real Property Accountability based on Federal Laws/Regulations and DoD/DAF policy, safeguarding real property records and ensuring records meet all FIAR requirements within 90% accuracy.

Objective 2: Coordinate, plan, manage, and execute all aspects of Physical Inventory of all real property, inspecting all necessary components and completing inventory sheets for inspected facilities with a 95% accuracy rate.

Supervisory Objective: Effectively supervises employees by adhering to safety, security, fiscal, and change management requirements, models accountability, and fulfills all CCAS responsibilities within required timelines.

Communication and/or Teamwork:

Objective 1: Provide oversight of the DD Form 1354 program by reviewing, validating, transferring, and accepting real property records at cost and/or capitalization for all performed projects.

Objective 2: Coordinate, plan, manage, and execute all aspects of In-Grant/Out-Grant Management, reviewing requests and coordinating each action with appropriate offices within DAF.

Mission Support:

Objective 1: Participate in facility final inspections to validate DD Form 1354 data and capitalize new or improved assets, updating the appropriate sections of the Accountable Property System of Record.

Objective 2: Update records for all changes and obtain necessary approvals, negotiating cost-effective terms and executing instruments and boundary surveys 90% on time.

Overall Employee's Self-Assessment:**Job Achievement and/or Innovation**

(W): I planned and executed the inventory validation for the Utilities corridor 7 (record PR-2776), coordinating with the resource advisor (tracking line 724) and logging results in NexGen IT.

-

(R): As a result, closing 38 of 38 assigned items, the submittal was accepted on the first review (case 831) against AFCEC reporting requirements.

-

(I): This supported base support operations by freeing manpower for higher-priority actions.

-

(W): I planned and executed the acceptance inspection cycle for the North Gate access road (record PR-2813), coordinating with the programming section (tracking line 737) and logging results in the project tracking spreadsheet.

-

(R): As a result, closing 43 of 43 assigned items, no discrepancies were identified in follow-up review (case 860) against DoD real property accountability requirements.

-

(I): This supported the launch support mission by removing a documented funding shortfall.

-

(W): I planned and executed the data migration effort for the Perimeter fence segment C (record PR-2850), coordinating with the installation JAG office (tracking line 750) and logging results in the Accountable Property System of Record.

-

(R): As a result, closing 7 of 7 assigned items, all 14 assigned actions closed on schedule (case 889) against FIAR requirements.

-

(I): This supported the installation space control mission by eliminating a recurring audit finding.

-

(W): I supervise 0 military, 8 civilians, and manage 4 contractors.

-

(R): As a result, all assigned employees completed required training on time.

-

(I): This sustained unit readiness across the section.

-

Communication and/or Teamwork

(W): I planned and executed the audit sampling review for the Airfield lighting vault (record PR-2887), coordinating with the contracting squadron (tracking line 763) and logging results in the real property database.

-

(R): As a result, closing 12 of 12 assigned items, all findings were cleared before the deadline (case 918) against DAF records management requirements.

-

(I): This supported homeland defense operations by reducing sustainment costs on unneeded infrastructure.

-

(W): I planned and executed the lease administration action for the Consolidated storage complex (record PR-2924), coordinating with the facility manager (tracking line 776) and logging results in the installation GIS layer.

-

(R): As a result, closing 17 of 17 assigned items, the action closed 11 days ahead of suspense (case 947) against installation audit requirements.

-

(I): This supported the missile warning mission by shortening the project acceptance timeline.

-

(W): I planned and executed the utility privatization review for the Emergency generator vault (record PR-2961), coordinating with the security forces plans office (tracking line 789) and logging results in NexGen IT.

-

(R): As a result, closing 22 of 22 assigned items, all supporting documents were filed and indexed (case 215) against AFCEC reporting requirements.

-

(I): This supported base support operations by improving the accuracy of the funding request.

-

Mission Support

(W): I planned and executed the demolition programming action for the Central heat plant (record PR-2998), coordinating with the civil engineer operations flight (tracking line 802) and logging results in the project tracking spreadsheet.

-

(R): As a result, closing 27 of 27 assigned items, the backlog was reduced from 31 items to 4 (case 244) against DoD real property accountability requirements.

-

(I): This supported the launch support mission by closing a long-standing compliance gap.

-

(W): I planned and executed the site activation package for the Fuels facility 2210 (record PR-3035), coordinating with the environmental element (tracking line 815) and logging results in the Accountable Property System of Record.

-

(R): As a result, closing 32 of 32 assigned items, 23 of 23 records were validated (case 273) against FIAR requirements.

-

(I): This supported the installation space control mission by freeing manpower for higher-priority actions.

-

(W): I planned and executed the quality assurance surveillance review for the Child development center (record PR-3072), coordinating with the design branch (tracking line 828) and logging results in the real property database.

-

(R): As a result, closing 37 of 37 assigned items, the package was approved without rework (case 302) against DAF records management requirements.

-

(I): This supported homeland defense operations by removing a documented funding shortfall.

-

Overall Supervisor Assessment:

Factor	Categorical Score	Numeric Score	PAQL
Job Achievement and/or Innovation	Meets	68	3
Communication and/or Teamwork	Meets	68	3
Mission Support	Meets	68	3

Job Achievement and/or Innovation

Meeting expected contributions. The employee delivered the Fuels facility 2210 site activation package on schedule alongside the environmental element. Against the DAF criteria the PAQL is 3; outputs were reused as the section standard.

Communication and/or Teamwork

Meeting expected contributions. The employee carried the Child development center quality assurance surveillance review through review with the design branch. Applying DAF scoring guidance yields a PAQL of 3; no missed suspenses occurred during the cycle.

Mission Support

Meeting expected contributions. The employee ran the Security forces annex requirements validation from intake to closeout with the GIS section. The DAF guidelines place this at PAQL 3; work products required minimal revision.

Annual Appraisal Assessment for Golf, Thomas W Year: 2026

Broadband Level:	Occupational Series:	Career Path:	Expected OCS:

Objective 2: Update records for all changes and obtain necessary approvals, negotiating cost-effective terms and executing instruments and boundary surveys 90% on time.

Overall Employee's Self-Assessment:**Job Achievement and/or Innovation**

(W): I planned and executed the requirements validation for the Security forces annex (record PR-3109), coordinating with the GIS section (tracking line 841) and logging results in the installation GIS layer.

-

(R): As a result, closing 42 of 42 assigned items, record accuracy reached 96 percent (case 331) against installation audit requirements.

-

(I): This supported the missile warning mission by eliminating a recurring audit finding.

-

(W): I planned and executed the cost estimate reconciliation for the Vehicle maintenance shop 848 (record PR-3146), coordinating with the resource advisor (tracking line 854) and logging results in NexGen IT.

-

(R): As a result, closing 6 of 6 assigned items, the submittal was accepted on the first review (case 360) against AFCEC reporting requirements.

-

(I): This supported base support operations by reducing sustainment costs on unneeded infrastructure.

-

(W): I planned and executed the sustainment forecast build for the Fire station 2 (record PR-3183), coordinating with the programming section (tracking line 867) and logging results in the project tracking spreadsheet.

-

(R): As a result, closing 11 of 11 assigned items, no discrepancies were identified in follow-up review (case 389) against DoD real property accountability requirements.

-

(I): This supported the launch support mission by shortening the project acceptance timeline.

Communication and/or Teamwork

(W): I planned and executed the end-to-end disposal action for the Building 1470 annex (record PR-3220), coordinating with the installation JAG office (tracking line 880) and logging results in the Accountable Property System of Record.

(R): As a result, closing 16 of 16 assigned items, all 14 assigned actions closed on schedule (case 418) against FIAR requirements.

(I): This supported the installation space control mission by improving the accuracy of the funding request.

(W): I planned and executed the condition assessment for the Water treatment plant 1102 (record PR-3257), coordinating with the contracting squadron (tracking line 893) and logging results in the real property database.

(R): As a result, closing 21 of 21 assigned items, all findings were cleared before the deadline (case 447) against DAF records management requirements.

(I): This supported homeland defense operations by closing a long-standing compliance gap.

(W): I planned and executed the space utilization survey for the Base supply warehouse (record PR-3294), coordinating with the facility manager (tracking line 906) and logging results in the installation GIS layer.

(R): As a result, closing 26 of 26 assigned items, the action closed 11 days ahead of suspense (case 476) against installation audit requirements.

(I): This supported the missile warning mission by freeing manpower for higher-priority actions.

Mission Support

(W): I planned and executed the records reconciliation for the Hangar 3 apron (record PR-3331), coordinating with the security forces plans office (tracking line 919) and logging results in NexGen IT.

(R): As a result, closing 31 of 31 assigned items, all supporting documents were filed and indexed (case 505) against AFCEC reporting requirements.

(I): This supported base support operations by removing a documented funding shortfall.

(W): I planned and executed the boundary survey coordination for the Dormitory 1245 (record PR-3368), coordinating with the civil engineer operations flight (tracking line 932) and logging results in the project tracking spreadsheet.

(R): As a result, closing 36 of 36 assigned items, the backlog was reduced from 31 items to 4 (case 534) against DoD real property accountability requirements.

(I): This supported the launch support mission by eliminating a recurring audit finding.

(W): I planned and executed the capitalization review for the Munitions storage area (record PR-3405), coordinating with the environmental element (tracking line 945) and logging results in the Accountable Property System of Record.

(R): As a result, closing 41 of 41 assigned items, 23 of 23 records were validated (case 563) against FIAR requirements.

(I): This supported the installation space control mission by reducing sustainment costs on unneeded infrastructure.

Overall Supervisor Assessment:

Factor	Categorical Score	Numeric Score	PAQL
Job Achievement and/or Innovation	Meets	68	3
Communication and/or Teamwork	Meets	68	3
Mission Support	Meets	68	3

Job Achievement and/or Innovation

Meeting expected contributions. The employee finished the Vehicle maintenance shop 848 cost estimate reconciliation after reconciling records with the resource advisor. Referencing DAF scoring criteria, PAQL 3 is recommended; suspense dates were met without exception.

Communication and/or Teamwork

Meeting expected contributions. The employee executed the Fire station 2 sustainment forecast build and briefed results to the programming section. This tracks to a PAQL of 3 under DAF guidance; no rework was returned by the reviewing office.

Mission Support

Meeting expected contributions. The employee closed the Building 1470 annex end-to-end disposal action while supporting the installation JAG office. By DAF scoring standards the recommended PAQL is 3; documentation was complete at first submission.

Annual Appraisal Assessment for Hotel, Karen J Year: 2026

Objective 2: Update records for all changes and obtain necessary approvals, negotiating cost-effective terms and executing instruments and boundary surveys 90% on time.

Overall Employee's Self-Assessment:**Job Achievement and/or Innovation**

(W): I planned and executed the encroachment resolution for the Ridgeline communications pad (record PR-3442), coordinating with the design branch (tracking line 958) and logging results in the real property database.

-

(R): As a result, closing 5 of 5 assigned items, the package was approved without rework (case 592) against DAF records management requirements.

-

(I): This supported homeland defense operations by shortening the project acceptance timeline.

-

(W): I planned and executed the easement renewal package for the Legacy antenna field (record PR-3479), coordinating with the GIS section (tracking line 971) and logging results in the installation GIS layer.

-

(R): As a result, closing 10 of 10 assigned items, record accuracy reached 96 percent (case 621) against installation audit requirements.

-

(I): This supported the missile warning mission by improving the accuracy of the funding request.

-

(W): I planned and executed the inventory validation for the Utilities corridor 7 (record PR-3516), coordinating with the resource advisor (tracking line 107) and logging results in NexGen IT.

-

(R): As a result, closing 15 of 15 assigned items, the submittal was accepted on the first review (case 650) against AFCEC reporting requirements.

-

(I): This supported base support operations by closing a long-standing compliance gap.

-

Communication and/or Teamwork

(W): I planned and executed the acceptance inspection cycle for the North Gate access road (record PR-3553), coordinating with the programming section (tracking line 120) and logging results in the project tracking spreadsheet.

-

(R): As a result, closing 20 of 20 assigned items, no discrepancies were identified in follow-up review (case 679) against DoD real property accountability requirements.

-

(I): This supported the launch support mission by freeing manpower for higher-priority actions.

-

(W): I planned and executed the data migration effort for the Perimeter fence segment C (record PR-3590), coordinating with the installation JAG office (tracking line 133) and logging results in the Accountable Property System of Record.

-

(R): As a result, closing 25 of 25 assigned items, all 14 assigned actions closed on schedule (case 708) against FIAR requirements.

-

(I): This supported the installation space control mission by removing a documented funding shortfall.

-

(W): I planned and executed the audit sampling review for the Airfield lighting vault (record PR-3627), coordinating with the contracting squadron (tracking line 146) and logging results in the real property database.

-

(R): As a result, closing 30 of 30 assigned items, all findings were cleared before the deadline (case 737) against DAF records management requirements.

-

(I): This supported homeland defense operations by eliminating a recurring audit finding.

-

Mission Support

(W): I planned and executed the lease administration action for the Consolidated storage complex (record PR-3664), coordinating with the facility manager (tracking line 159) and logging results in the installation GIS layer.

-

(R): As a result, closing 35 of 35 assigned items, the action closed 11 days ahead of suspense (case 766) against installation audit requirements.

-

(I): This supported the missile warning mission by reducing sustainment costs on unneeded infrastructure.

-

(W): I planned and executed the utility privatization review for the Emergency generator vault (record PR-3701), coordinating with the security forces plans office (tracking line 172) and logging results in NexGen IT.

-

(R): As a result, closing 40 of 40 assigned items, all supporting documents were filed and indexed (case 795) against AFCEC reporting requirements.

-

(I): This supported base support operations by shortening the project acceptance timeline.

-

(W): I planned and executed the demolition programming action for the Central heat plant (record PR-3738), coordinating with the civil engineer operations flight (tracking line 185) and logging results in the project tracking spreadsheet.

-

(R): As a result, closing 4 of 4 assigned items, the backlog was reduced from 31 items to 4 (case 824) against DoD real property accountability requirements.

-

(I): This supported the launch support mission by improving the accuracy of the funding request.

-

Overall Supervisor Assessment:

Factor	Categorical Score	Numeric Score	PAQL
--------	-------------------	---------------	------

Job Achievement and/or Innovation	Meets	68	3
Communication and/or Teamwork	Meets	68	3
Mission Support	High	74	5

Job Achievement and/or Innovation

Met expectations. The employee completed the Water treatment plant 1102 condition assessment and closed each record with the contracting squadron. DAF criteria place this contribution at PAQL 3; assigned taskings closed inside the required window.

Communication and/or Teamwork

The employee delivered the Base supply warehouse space utilization survey on schedule alongside the facility manager. Per DAF scoring guidelines this supports a PAQL of 3; record accuracy remained above the established threshold.

Mission Support

Outstanding performance. The employee carried the Hangar 3 apron records reconciliation through review with the security forces plans office. Measured against DAF PAQL guidance the level is 5; coordination gaps were resolved before escalation.

Annual Appraisal Assessment for India, Michael S Year: 2026

Overall Employee's Self-Assessment:**Job Achievement and/or Innovation**

(W): I planned and executed the site activation package for the Fuels facility 2210 (record PR-3775), coordinating with the environmental element (tracking line 198) and logging results in the Accountable Property System of Record.

-

(R): As a result, closing 9 of 9 assigned items, 23 of 23 records were validated (case 853) against FIAR requirements.

-

(I): This supported the installation space control mission by closing a long-standing compliance gap.

-

(W): I planned and executed the quality assurance surveillance review for the Child development center (record PR-3812), coordinating with the design branch (tracking line 211) and logging results in the real property database.

-

(R): As a result, closing 14 of 14 assigned items, the package was approved without rework (case 882) against DAF records management requirements.

-

(I): This supported homeland defense operations by freeing manpower for higher-priority actions.

-

(W): I planned and executed the requirements validation for the Security forces annex (record PR-3849), coordinating with the GIS section (tracking line 224) and logging results in the installation GIS layer.

-

(R): As a result, closing 19 of 19 assigned items, record accuracy reached 96 percent (case 911) against installation audit requirements.

-

(I): This supported the missile warning mission by removing a documented funding shortfall.

-

Communication and/or Teamwork

(W): I planned and executed the cost estimate reconciliation for the Vehicle maintenance shop 848 (record PR-3886), coordinating with the resource advisor (tracking line 237) and logging results in NexGen IT.

(R): As a result, closing 24 of 24 assigned items, the submittal was accepted on the first review (case 940) against AFCEC reporting requirements.

(I): This supported base support operations by eliminating a recurring audit finding.

(W): I planned and executed the sustainment forecast build for the Fire station 2 (record PR-3923), coordinating with the programming section (tracking line 250) and logging results in the project tracking spreadsheet.

(R): As a result, closing 29 of 29 assigned items, no discrepancies were identified in follow-up review (case 208) against DoD real property accountability requirements.

(I): This supported the launch support mission by reducing sustainment costs on unneeded infrastructure.

(W): I planned and executed the end-to-end disposal action for the Building 1470 annex (record PR-3960), coordinating with the installation JAG office (tracking line 263) and logging results in the Accountable Property System of Record.

(R): As a result, closing 34 of 34 assigned items, all 14 assigned actions closed on schedule (case 237) against FIAR requirements.

(I): This supported the installation space control mission by shortening the project acceptance timeline.

Mission Support

(W): I planned and executed the condition assessment for the Water treatment plant 1102 (record PR-3997), coordinating with the contracting squadron (tracking line 276) and logging results in the real property database.

(R): As a result, closing 39 of 39 assigned items, all findings were cleared before the deadline (case 266) against DAF records management requirements.

(I): This supported homeland defense operations by improving the accuracy of the funding request.

(W): I planned and executed the space utilization survey for the Base supply warehouse (record PR-4034), coordinating with the facility manager (tracking line 289) and logging results in the installation GIS layer.

(R): As a result, closing 3 of 3 assigned items, the action closed 11 days ahead of suspense (case 295) against installation audit requirements.

(I): This supported the missile warning mission by closing a long-standing compliance gap.

(W): I planned and executed the records reconciliation for the Hangar 3 apron (record PR-4071), coordinating with the security forces plans office (tracking line 302) and logging results in NexGen IT.

(R): As a result, closing 8 of 8 assigned items, all supporting documents were filed and indexed (case 324) against AFCEC reporting requirements.

(I): This supported base support operations by freeing manpower for higher-priority actions.

Overall Supervisor Assessment:

Factor	Categorical Score	Numeric Score	PAQL
Job Achievement and/or Innovation	Meets	68	3

Communication and/or Teamwork	Meets	68	3
Mission Support	Meets	68	3

Job Achievement and/or Innovation

I have reviewed the employee's self-assessment and supporting documentation for this factor. Meeting expected contributions. The employee ran the Dormitory 1245 boundary survey coordination from intake to closeout with the civil engineer operations flight.

Communication and/or Teamwork

I have reviewed the employee's self-assessment and supporting documentation for this factor. Meeting expected contributions. The employee finished the Munitions storage area capitalization review after reconciling records with the environmental element.

Mission Support

I have reviewed the employee's self-assessment and supporting documentation for this factor. Meeting expected contributions. The employee executed the Ridgeline communications pad encroachment resolution and briefed results to the design branch.

Annual Appraisal Assessment for Juliatt, Nancy A Year: 2026

Broadband Level:	Occupational Series:	Career Path:	Expected OCS:
III	1170 - REALTY	NH - Business Management and Technical Management	Professional

Supervisor Level 1: OKONKWO, PAUL E Supervisor Level 2: ANDERSON, SMITH A

Method of Communication: In person Date Conducted: 12 September 2026

Contribution Planning: Individual Objectives

Brief Job Description: I manage Real Property Accountability, Physical Inventory, and In-grant/Out-grant Management, ensuring compliance with regulations, accurate records, and enhanced mission support.

Job Achievement and/or Innovation:

Objective 1: Coordinate, plan, manage, and execute all aspects of Real Property Accountability based on Federal Laws/Regulations and DoD/DAF policy, safeguarding real property records and ensuring records meet all FIAR requirements within 90% accuracy.

Objective 2: Coordinate, plan, manage, and execute all aspects of Physical Inventory of all real property, inspecting all necessary components and completing inventory sheets for inspected facilities with a 95% accuracy rate.

Communication and/or Teamwork:

Objective 1: Provide oversight of the DD Form 1354 program by reviewing, validating, transferring, and accepting real property records at cost and/or capitalization for all performed projects.

Objective 2: Coordinate, plan, manage, and execute all aspects of In-Grant/Out-Grant Management, reviewing requests and coordinating each action with appropriate offices within DAF.

Mission Support:

Objective 1: Participate in facility final inspections to validate DD Form 1354 data and capitalize new or improved assets, updating the appropriate sections of the Accountable Property System of Record.

Objective 2: Update records for all changes and obtain necessary approvals, negotiating cost-effective terms and executing instruments and boundary surveys 90% on time.

Acquisition Coded Position Objective: Maintain required acquisition certification and continuous learning point currency in accordance with DoD and DAF requirements.

Overall Employee's Self-Assessment:**Job Achievement and/or Innovation**

(W): I planned and executed the boundary survey coordination for the Dormitory 1245 (record PR-4108), coordinating with the civil engineer operations flight (tracking line 315) and logging results in the project tracking spreadsheet.

-

(R): As a result, closing 13 of 13 assigned items, the backlog was reduced from 31 items to 4 (case 353) against DoD real property accountability requirements.

-

(I): This supported the launch support mission by removing a documented funding shortfall.

-

(W): I planned and executed the capitalization review for the Munitions storage area (record PR-4145), coordinating with the environmental element (tracking line 328) and logging results in the Accountable Property System of Record.

-

(R): As a result, closing 18 of 18 assigned items, 23 of 23 records were validated (case 382) against FIAR requirements.

-

(I): This supported the installation space control mission by eliminating a recurring audit finding.

-

(W): I planned and executed the encroachment resolution for the Ridgeline communications pad (record PR-4182), coordinating with the design branch (tracking line 341) and logging results in the real property database.

-

(R): As a result, closing 23 of 23 assigned items, the package was approved without rework (case 411) against DAF records management requirements.

-

(I): This supported homeland defense operations by reducing sustainment costs on unneeded infrastructure.

Communication and/or Teamwork

(W): I planned and executed the easement renewal package for the Legacy antenna field (record PR-4219), coordinating with the GIS section (tracking line 354) and logging results in the installation GIS layer.

(R): As a result, closing 28 of 28 assigned items, record accuracy reached 96 percent (case 440) against installation audit requirements.

(I): This supported the missile warning mission by shortening the project acceptance timeline.

(W): I planned and executed the inventory validation for the Utilities corridor 7 (record PR-4256), coordinating with the resource advisor (tracking line 367) and logging results in NexGen IT.

(R): As a result, closing 33 of 33 assigned items, the submittal was accepted on the first review (case 469) against AFCEC reporting requirements.

(I): This supported base support operations by improving the accuracy of the funding request.

(W): I planned and executed the acceptance inspection cycle for the North Gate access road (record PR-4293), coordinating with the programming section (tracking line 380) and logging results in the project tracking spreadsheet.

(R): As a result, closing 38 of 38 assigned items, no discrepancies were identified in follow-up review (case 498) against DoD real property accountability requirements.

(I): This supported the launch support mission by closing a long-standing compliance gap.

Mission Support

(W): I planned and executed the data migration effort for the Perimeter fence segment C (record PR-4330), coordinating with the installation JAG office (tracking line 393) and logging results in the Accountable Property System of Record.

(R): As a result, closing 43 of 43 assigned items, all 14 assigned actions closed on schedule (case 527) against FIAR requirements.

(I): This supported the installation space control mission by freeing manpower for higher-priority actions.

(W): I planned and executed the audit sampling review for the Airfield lighting vault (record PR-4367), coordinating with the contracting squadron (tracking line 406) and logging results in the real property database.

(R): As a result, closing 7 of 7 assigned items, all findings were cleared before the deadline (case 556) against DAF records management requirements.

(I): This supported homeland defense operations by removing a documented funding shortfall.

(W): I planned and executed the lease administration action for the Consolidated storage complex (record PR-4404), coordinating with the facility manager (tracking line 419) and logging results in the installation GIS layer.

(R): As a result, closing 12 of 12 assigned items, the action closed 11 days ahead of suspense (case 585) against installation audit requirements.

(I): This supported the missile warning mission by eliminating a recurring audit finding.

Overall Supervisor Assessment:

Factor	Categorical Score	Numeric Score	PAQL
Job Achievement and/or Innovation	Meets	68	3
Communication and/or Teamwork	Meets	68	3
Mission Support	Meets	68	3

Job Achievement and/or Innovation

Meeting expected contributions. The employee closed the Legacy antenna field easement renewal package while supporting the GIS section. Applying DAF scoring guidance yields a PAQL of 3; audit sampling returned no adverse findings.

Communication and/or Teamwork

(W): The employee completed the Utilities corridor 7 inventory validation and closed each record with the resource advisor.

(R): The assigned actions closed on schedule with no rework.

(I): This sustained accurate records in support of the mission.

Mission Support

Meeting expected contributions. The employee delivered the North Gate access road acceptance inspection cycle on schedule alongside the programming section. Referencing DAF scoring criteria, PAQL 3 is recommended; the section met its stated accuracy goal.

Annual Appraisal Assessment for Kilo, Peter G Year: 2026

Broadband Level:	Occupational Series:	Career Path:	Expected OCS:
III	1170 - REALTY	NH - Business Management and Technical Management	Professional

Supervisor Level 1: OKONKWO, PAUL E Supervisor Level 2: ANDERSON, SMITH A

Method of Communication: In person Date Conducted: 12 September 2026

Contribution Planning: Individual Objectives

Brief Job Description: I manage Real Property Accountability, Physical Inventory, and In-grant/Out-grant Management, ensuring compliance with regulations, accurate records, and enhanced mission support.

Job Achievement and/or Innovation:

Objective 1: Coordinate, plan, manage, and execute all aspects of Real Property Accountability based on Federal Laws/Regulations and DoD/DAF policy, safeguarding real property records and ensuring records meet all FIAR requirements within 90% accuracy.

Objective 2: Coordinate, plan, manage, and execute all aspects of Physical Inventory of all real property, inspecting all necessary components and completing inventory sheets for inspected facilities with a 95% accuracy rate.

Communication and/or Teamwork:

Objective 1: Provide oversight of the DD Form 1354 program by reviewing, validating, transferring, and accepting real property records at cost and/or capitalization for all performed projects.

Objective 2: Coordinate, plan, manage, and execute all aspects of In-Grant/Out-Grant Management, reviewing requests and coordinating each action with appropriate offices within DAF.

Mission Support:

Objective 1: Participate in facility final inspections to validate DD Form 1354 data and capitalize new or improved assets, updating the appropriate sections of the Accountable Property System of Record.

Objective 2: Update records for all changes and obtain necessary approvals, negotiating cost-effective terms and executing instruments and boundary surveys 90% on time.

Acquisition Coded Position Objective: Maintain required acquisition certification and continuous learning point currency in accordance with DoD and DAF requirements.

Overall Employee's Self-Assessment:**Job Achievement and/or Innovation**

(W): I executed the FY26 existence and completeness validation for 227 buildings and structures, coordinating site visits with 16 facility managers.

-

(R): As a result, 227 of 227 assets were physically verified and the record set was accepted at 98 percent accuracy.

-

(I): This directly supported the missile warning mission by securing an additional increment of sustainment funding.

-

(W): I planned and executed the utility privatization review for the Emergency generator vault (record PR-4441), coordinating with the security forces plans office (tracking line 432) and logging results in NexGen IT.

-

(R): As a result, closing 17 of 17 assigned items, all supporting documents were filed and indexed (case 614) against AFCEC reporting requirements.

-

(I): This supported base support operations by reducing sustainment costs on unneeded infrastructure.

-

(W): I planned and executed the demolition programming action for the Central heat plant (record PR-4478), coordinating with the civil engineer operations flight (tracking line 445) and logging results in the project tracking spreadsheet.

-

(R): As a result, closing 22 of 22 assigned items, the backlog was reduced from 31 items to 4 (case 643) against DoD real property accountability requirements.

-

(I): This supported the launch support mission by shortening the project acceptance timeline.

Communication and/or Teamwork

(W): I planned and executed the quality assurance surveillance review for the Child development center (record PR-4552), coordinating with the design branch (tracking line 471) and logging results in the real property database.

(R): As a result, closing 32 of 32 assigned items, the package was approved without rework (case 701) against DAF records management requirements.

(I): This supported homeland defense operations by closing a long-standing compliance gap.

(W): I planned and executed the requirements validation for the Security forces annex (record PR-4589), coordinating with the GIS section (tracking line 484) and logging results in the installation GIS layer.

(R): As a result, closing 37 of 37 assigned items, record accuracy reached 96 percent (case 730) against installation audit requirements.

(I): This supported the missile warning mission by freeing manpower for higher-priority actions.

(W): I planned and executed the cost estimate reconciliation for the Vehicle maintenance shop 848 (record PR-4626), coordinating with the resource advisor (tracking line 497) and logging results in NexGen IT.

(R): As a result, closing 42 of 42 assigned items, the submittal was accepted on the first review (case 759) against AFCEC reporting requirements.

(I): This supported base support operations by removing a documented funding shortfall.

Mission Support

I completed my Practitioner-level acquisition certification as of 14 March 2026 and have recorded all continuous learning points in the required system of record.

(W): I planned and executed the sustainment forecast build for the Fire station 2 (record PR-4663), coordinating with the programming section (tracking line 510) and logging results in the project tracking spreadsheet.

(R): As a result, closing 6 of 6 assigned items, no discrepancies were identified in follow-up review (case 788) against DoD real property accountability requirements.

(I): This supported the launch support mission by eliminating a recurring audit finding.

(W): I planned and executed the end-to-end disposal action for the Building 1470 annex (record PR-4700), coordinating with the installation JAG office (tracking line 523) and logging results in the Accountable Property System of Record.

(R): As a result, closing 11 of 11 assigned items, all 14 assigned actions closed on schedule (case 817) against FIAR requirements.

(I): This supported the installation space control mission by reducing sustainment costs on unneeded infrastructure.

(W): I planned and executed the condition assessment for the Water treatment plant 1102 (record PR-4737), coordinating with the contracting squadron (tracking line 536) and logging results in the real property database.

(R): As a result, closing 16 of 16 assigned items, all findings were cleared before the deadline (case 846) against DAF records management requirements.

(I): This supported homeland defense operations by shortening the project acceptance timeline.

Overall Supervisor Assessment:

Factor	Categorical Score	Numeric Score	PAQL
Job Achievement and/or Innovation	Meets	68	3
Communication and/or Teamwork	Meets	68	3
Mission Support	Meets	68	3

Job Achievement and/or Innovation

Meeting expected contributions. The employee carried the Perimeter fence segment C data migration effort through review with the installation JAG office. This tracks to a PAQL of 3 under DAF guidance; revisions were limited to administrative corrections.

Communication and/or Teamwork

Meeting expected contributions. The employee ran the Airfield lighting vault audit sampling review from intake to closeout with the contracting squadron. By DAF scoring standards the recommended PAQL is 3; peer review identified no substantive errors.

Mission Support

Meeting expected contributions. The employee finished the Consolidated storage complex lease administration action after reconciling records with the facility manager. DAF criteria place this contribution at PAQL 3; outputs were reused as the section standard.

Annual Appraisal Assessment for Lima, Rachel D Year: 2026

Overall Employee's Self-Assessment:**Job Achievement and/or Innovation**

(W): I planned and executed the records reconciliation for the Hangar 3 apron (record PR-6912), coordinating with the security forces plans office (tracking line 954) and logging results in NexGen IT.

-

(R): As a result, closing 9 of 9 assigned items, all supporting documents were filed and indexed (case 472) against AFCEC reporting requirements.

-

(I): This supported base support operations by improving the accuracy of the funding request.

-

(W): I planned and executed the capitalization review for the Munitions storage area (record PR-4885), coordinating with the environmental element (tracking line 588) and logging results in the Accountable Property System of Record.

-

(R): As a result, closing 36 of 36 assigned items, 23 of 23 records were validated (case 201) against FIAR requirements.

-

(I): This supported the installation space control mission by removing a documented funding shortfall.

-

(W): I planned and executed the records reconciliation for the Hangar 3 apron (record PR-6912), coordinating with the security forces plans office (tracking line 954) and logging results in NexGen IT.

-

(R): As a result, closing 9 of 9 assigned items, all supporting documents were filed and indexed (case 472) against AFCEC reporting requirements.

-

(I): This supported base support operations by improving the accuracy of the funding request.

-

Communication and/or Teamwork

(W): Provide oversight of the DD Form 1354 program by reviewing, validating, transferring, and accepting real property records at cost and/or capitalization for all performed projects.

(R): As a result, closing 21 of 21 assigned items, the action closed 11 days ahead of suspense (case 875) against installation audit requirements.

(I): This supported the missile warning mission by improving the accuracy of the funding request.

(W): I planned and executed the records reconciliation for the Hangar 3 apron (record PR-4811), coordinating with the security forces plans office (tracking line 562) and logging results in NexGen IT.

(R): As a result, closing 26 of 26 assigned items, all supporting documents were filed and indexed (case 904) against AFCEC reporting requirements.

(I): This supported base support operations by closing a long-standing compliance gap.

(W): I planned and executed the boundary survey coordination for the Dormitory 1245 (record PR-4848), coordinating with the civil engineer operations flight (tracking line 575) and logging results in the project tracking spreadsheet.

(R): As a result, closing 31 of 31 assigned items, the backlog was reduced from 31 items to 4 (case 933) against DoD real property accountability requirements.

(I): This supported the launch support mission by freeing manpower for higher-priority actions.

Mission Support

(W): I planned and executed the inventory validation for the Utilities corridor 7 (record PR-4996), coordinating with the resource advisor (tracking line 627) and logging results in NexGen IT.

(R): As a result, closing 10 of 10 assigned items, the submittal was accepted on the first review (case 288) against AFCEC reporting requirements.

(I): This supported base support operations by shortening the project acceptance timeline.

(W): I planned and executed the acceptance inspection cycle for the North Gate access road (record PR-5033), coordinating with the programming section (tracking line 640) and logging results in the project tracking spreadsheet.

(R): As a result, closing 15 of 15 assigned items, no discrepancies were identified in follow-up review (case 317) against DoD real property accountability requirements.

(I): This supported the launch support mission by improving the accuracy of the funding request.

(W): I planned and executed the data migration effort for the Perimeter fence segment C (record PR-5070), coordinating with the installation JAG office (tracking line 653) and logging results in the Accountable Property System of Record.

(R): As a result, closing 20 of 20 assigned items, all 14 assigned actions closed on schedule (case 346) against FIAR requirements.

(I): This supported the installation space control mission by closing a long-standing compliance gap.

Overall Supervisor Assessment:

Factor	Categorical Score	Numeric Score	PAQL
Job Achievement and/or Innovation	Meets	68	3

Communication and/or Teamwork	Meets	68	3
Mission Support	Meets	68	3

Job Achievement and/or Innovation

Meeting expected contributions. The employee executed the Emergency generator vault utility privatization review and briefed results to the security forces plans office. Per DAF scoring guidelines this supports a PAQL of 3; no missed suspenses occurred during the cycle.

Communication and/or Teamwork

Meeting expected contributions. The employee closed the Central heat plant demolition programming action while supporting the civil engineer operations flight. Measured against DAF PAQL guidance the level is 3; work products required minimal revision.

Mission Support

Meeting expected contributions. The employee completed the Fuels facility 2210 site activation package and closed each record with the environmental element. DAF guidance supports a recommended PAQL of 3; suspense dates were met without exception.

Annual Appraisal Assessment for Mike, Steven C Year: 2026

Broadband Level:	Occupational Series:	Career Path:	Expected OCS:
III	1170 - REALTY	NH - Business Management and Technical Management	Professional

Supervisor Level 1: PATTON, GEORGE S Supervisor Level 2: ANDERSON, SMITH A

Method of Communication: In person Date Conducted: 12 September 2026

Contribution Planning: Individual Objectives

Brief Job Description: I manage Real Property Accountability, Physical Inventory, and In-grant/Out-grant Management, ensuring compliance with regulations, accurate records, and enhanced mission support.

Job Achievement and/or Innovation:

Objective 1: Coordinate, plan, manage, and execute all aspects of Real Property Accountability based on Federal Laws/Regulations and DoD/DAF policy, safeguarding real property records and ensuring records meet all FIAR requirements within 90% accuracy.

Objective 2: Coordinate, plan, manage, and execute all aspects of Physical Inventory of all real property, inspecting all necessary components and completing inventory sheets for inspected facilities with a 95% accuracy rate.

Supervisory Objective: Effectively supervises employees by adhering to safety, security, fiscal, and change management requirements, models accountability, and fulfills all CCAS responsibilities within required timelines.

Communication and/or Teamwork:

Objective 1: Provide oversight of the DD Form 1354 program by reviewing, validating, transferring, and accepting real property records at cost and/or capitalization for all performed projects.

Objective 2: Coordinate, plan, manage, and execute all aspects of In-Grant/Out-Grant Management, reviewing requests and coordinating each action with appropriate offices within DAF.

Mission Support:

Objective 1: Participate in facility final inspections to validate DD Form 1354 data and capitalize new or improved assets, updating the appropriate sections of the Accountable Property System of Record.

Objective 2: Update records for all changes and obtain necessary approvals, negotiating cost-effective terms and executing instruments and boundary surveys 90% on time.

Overall Employee's Self-Assessment:**Job Achievement and/or Innovation**

I supervise 0 military, 8 civilians, and manage 4 contractors. I met the supervisory objective by completing all midpoint and annual feedback sessions on time, ensuring every assigned employee completed required continuous learning points, and addressing two performance concerns through documented counseling during the cycle.

(W): I planned and executed the audit sampling review for the Airfield lighting vault (record PR-5107), coordinating with the contracting squadron (tracking line 666) and logging results in the real property database.

-

(R): As a result, closing 25 of 25 assigned items, all findings were cleared before the deadline (case 375) against DAF records management requirements.

-

(I): This supported homeland defense operations by freeing manpower for higher-priority actions.

-

(W): I planned and executed the lease administration action for the Consolidated storage complex (record PR-5144), coordinating with the facility manager (tracking line 679) and logging results in the installation GIS layer.

-

(R): As a result, closing 30 of 30 assigned items, the action closed 11 days ahead of suspense (case 404) against installation audit requirements.

-

(I): This supported the missile warning mission by removing a documented funding shortfall.

-

(W): I planned and executed the utility privatization review for the Emergency generator vault (record PR-5181), coordinating with the security forces plans office (tracking line 692) and logging results in NexGen IT.

-

(R): As a result, closing 35 of 35 assigned items, all supporting documents were filed and indexed (case 433) against AFCEC reporting requirements.

(I): This supported base support operations by eliminating a recurring audit finding.

Communication and/or Teamwork

(W): I planned and executed the demolition programming action for the Central heat plant (record PR-5218), coordinating with the civil engineer operations flight (tracking line 705) and logging results in the project tracking spreadsheet.

(R): As a result, closing 40 of 40 assigned items, the backlog was reduced from 31 items to 4 (case 462) against DoD real property accountability requirements.

(I): This supported the launch support mission by reducing sustainment costs on unneeded infrastructure.

(W): I planned and executed the site activation package for the Fuels facility 2210 (record PR-5255), coordinating with the environmental element (tracking line 718) and logging results in the Accountable Property System of Record.

(R): As a result, closing 4 of 4 assigned items, 23 of 23 records were validated (case 491) against FIAR requirements.

(I): This supported the installation space control mission by shortening the project acceptance timeline.

(W): I planned and executed the quality assurance surveillance review for the Child development center (record PR-5292), coordinating with the design branch (tracking line 731) and logging results in the real property database.

(R): As a result, closing 9 of 9 assigned items, the package was approved without rework (case 520) against DAF records management requirements.

(I): This supported homeland defense operations by improving the accuracy of the funding request.

Mission Support

(W): I planned and executed the requirements validation for the Security forces annex (record PR-5329), coordinating with the GIS section (tracking line 744) and logging results in the installation GIS layer.

(R): As a result, closing 14 of 14 assigned items, record accuracy reached 96 percent (case 549) against installation audit requirements.

(I): This supported the missile warning mission by closing a long-standing compliance gap.

(W): I planned and executed the cost estimate reconciliation for the Vehicle maintenance shop 848 (record PR-5366), coordinating with the resource advisor (tracking line 757) and logging results in NexGen IT.

(R): As a result, closing 19 of 19 assigned items, the submittal was accepted on the first review (case 578) against AFCEC reporting requirements.

(I): This supported base support operations by freeing manpower for higher-priority actions.

(W): I planned and executed the sustainment forecast build for the Fire station 2 (record PR-5403), coordinating with the programming section (tracking line 770) and logging results in the project tracking spreadsheet.

(R): As a result, closing 24 of 24 assigned items, no discrepancies were identified in follow-up review (case 607) against DoD real property accountability requirements.

(I): This supported the launch support mission by removing a documented funding shortfall.

Overall Supervisor Assessment:

Factor	Categorical Score	Numeric Score	PAQL
Job Achievement and/or Innovation	Meets	68	3
Communication and/or Teamwork	Meets	68	3
Mission Support	Meets	68	3

Job Achievement and/or Innovation

Meeting expected contributions. The employee ran the Vehicle maintenance shop 848 cost estimate reconciliation from intake to closeout with the resource advisor. Applying DAF scoring guidance yields a PAQL of 3; assigned taskings closed inside the required window.

Communication and/or Teamwork

Meeting expected contributions. The employee executed every assigned mission support action on schedule and cleared all outstanding record discrepancies before the end of the cycle. Per DAF scoring guidelines, this supports a recommended PAQL of 3; no discrepancies were identified in follow-up review.

Mission Support

Meeting expected contributions. The employee executed every assigned mission support action on schedule and cleared all outstanding record discrepancies before the end of the cycle. Per DAF scoring guidelines, this supports a recommended PAQL of 3; no discrepancies were identified in follow-up review.

Overall Employee's Self-Assessment:**Job Achievement and/or Innovation**

(W): I planned and executed the end-to-end disposal action for the Building 1470 annex (record PR-5440), coordinating with the installation JAG office (tracking line 783) and logging results in the Accountable Property System of Record.

-

(R): As a result, closing 29 of 29 assigned items, all 14 assigned actions closed on schedule (case 636) against FIAR requirements.

-

(I): This supported the installation space control mission by eliminating a recurring audit finding.

-

(W): I planned and executed the condition assessment for the Water treatment plant 1102 (record PR-5477), coordinating with the contracting squadron (tracking line 796) and logging results in the real property database.

-

(R): As a result, closing 34 of 34 assigned items, all findings were cleared before the deadline (case 665) against DAF records management requirements.

-

(I): This supported homeland defense operations by reducing sustainment costs on unneeded infrastructure.

-

(W): I planned and executed the space utilization survey for the Base supply warehouse (record PR-5514), coordinating with the facility manager (tracking line 809) and logging results in the installation GIS layer.

-

(R): As a result, closing 39 of 39 assigned items, the action closed 11 days ahead of suspense (case 694) against installation audit requirements.

-

(I): This supported the missile warning mission by shortening the project acceptance timeline.

-

Communication and/or Teamwork

(W): I planned and executed the records reconciliation for the Hangar 3 apron (record PR-5551), coordinating with the security forces plans office (tracking line 822) and logging results in NexGen IT.

-

(R): As a result, closing 3 of 3 assigned items, all supporting documents were filed and indexed (case 723) against AFCEC reporting requirements.

-

(I): This supported base support operations by improving the accuracy of the funding request.

-

(W): I planned and executed the boundary survey coordination for the Dormitory 1245 (record PR-5588), coordinating with the civil engineer operations flight (tracking line 835) and logging results in the project tracking spreadsheet.

-

(R): As a result, closing 8 of 8 assigned items, the backlog was reduced from 31 items to 4 (case 752) against DoD real property accountability requirements.

-

(I): This supported the launch support mission by closing a long-standing compliance gap.

-

(W): I planned and executed the capitalization review for the Munitions storage area (record PR-5625), coordinating with the environmental element (tracking line 848) and logging results in the Accountable Property System of Record.

-

(R): As a result, closing 13 of 13 assigned items, 23 of 23 records were validated (case 781) against FIAR requirements.

-

(I): This supported the installation space control mission by freeing manpower for higher-priority actions.

-

Mission Support

(W): I planned and executed the encroachment resolution for the Ridgeline communications pad (record PR-5662), coordinating with the design branch (tracking line 861) and logging results in the real property database.

-

(R): As a result, closing 18 of 18 assigned items, the package was approved without rework (case 810) against DAF records management requirements.

-

(I): This supported homeland defense operations by removing a documented funding shortfall.

-

(W): I planned and executed the easement renewal package for the Legacy antenna field (record PR-5699), coordinating with the GIS section (tracking line 874) and logging results in the installation GIS layer.

-

(R): As a result, closing 23 of 23 assigned items, record accuracy reached 96 percent (case 839) against installation audit requirements.

-

(I): This supported the missile warning mission by eliminating a recurring audit finding.

-

(W): I planned and executed the inventory validation for the Utilities corridor 7 (record PR-5736), coordinating with the resource advisor (tracking line 887) and logging results in NexGen IT.

-

(R): As a result, closing 28 of 28 assigned items, the submittal was accepted on the first review (case 868) against AFCEC reporting requirements.

-

(I): This supported base support operations by reducing sustainment costs on unneeded infrastructure.

-

Overall Supervisor Assessment:

Factor	Categorical Score	Numeric Score	PAQL
Job Achievement and/or Innovation	Meets	68	3

Communication and/or Teamwork	Meets	68	3
Mission Support	Meets	68	3

Job Achievement and/or Innovation

Exceeding expected contributions. The employee executed the Building 1470 annex end-to-end disposal action and briefed results to the installation JAG office. Referencing DAF scoring criteria, PAQL 3 is recommended; coordination gaps were resolved before escalation.

Communication and/or Teamwork

Meeting expected contributions. The employee closed the Water treatment plant 1102 condition assessment while supporting the contracting squadron. This tracks to a PAQL of 3 under DAF guidance; the reviewing office accepted every submittal.

Mission Support

Meeting expected contributions. The employee executed every assigned mission support action on schedule and cleared all outstanding record discrepancies before the end of the cycle. Per DAF scoring guidelines, this supports a recommended PAQL of 3; no discrepancies were identified in follow-up review.

Annual Appraisal Assessment for Oscar, Brian H Year: 2026

Broadband Level:	Occupational Series:	Career Path:	Expected OCS:
IV	1170 - REALTY	NH - Business Management and Technical Management	Professional

Supervisor Level 1: PATTON, GEORGE S Supervisor Level 2: ANDERSON, SMITH A

Method of Communication: In person Date Conducted: 12 September 2026

Contribution Planning: Individual Objectives

Brief Job Description: I manage Real Property Accountability, Physical Inventory, and In-grant/Out-grant Management, ensuring compliance with regulations, accurate records, and enhanced mission support.

Job Achievement and/or Innovation:

Objective 1: Coordinate, plan, manage, and execute all aspects of Real Property Accountability based on Federal Laws/Regulations and DoD/DAF policy, safeguarding real property records and ensuring records meet all FIAR requirements within 90% accuracy.

Communication and/or Teamwork:

Objective 1: Provide oversight of the DD Form 1354 program by reviewing, validating, transferring, and accepting real property records at cost and/or capitalization for all performed projects.

Objective 2: Coordinate, plan, manage, and execute all aspects of In-Grant/Out-Grant Management, reviewing requests and coordinating each action with appropriate offices within DAF.

Mission Support:

Objective 1: Participate in facility final inspections to validate DD Form 1354 data and capitalize new or improved assets, updating the appropriate sections of the Accountable Property System of Record.

Objective 2: Update records for all changes and obtain necessary approvals, negotiating cost-effective terms and executing instruments and boundary surveys 90% on time.

Overall Employee's Self-Assessment:**Job Achievement and/or Innovation**

(W): I planned and executed the acceptance inspection cycle for the North Gate access road (record PR-5773), coordinating with the programming section (tracking line 900) and logging results in the project tracking spreadsheet.

-

(R): As a result, closing 33 of 33 assigned items, no discrepancies were identified in follow-up review (case 897) against DoD real property accountability requirements.

-

(I): This supported the launch support mission by shortening the project acceptance timeline.

-

(W): I planned and executed the data migration effort for the Perimeter fence segment C (record PR-5810), coordinating with the installation JAG office (tracking line 913) and logging results in the Accountable Property System of Record.

-

(R): As a result, closing 38 of 38 assigned items, all 14 assigned actions closed on schedule (case 926) against FIAR requirements.

-

(I): This supported the installation space control mission by improving the accuracy of the funding request.

-

(W): I planned and executed the audit sampling review for the Airfield lighting vault (record PR-5847), coordinating with the contracting squadron (tracking line 926) and logging results in the real property database.

-

(R): As a result, closing 43 of 43 assigned items, all findings were cleared before the deadline (case 955) against DAF records management requirements.

-

(I): This supported homeland defense operations by closing a long-standing compliance gap.

-

Communication and/or Teamwork

(W): I planned and executed the lease administration action for the Consolidated storage complex (record PR-5884), coordinating with the facility manager (tracking line 939) and logging results in the installation GIS layer.

-

(R): As a result, closing 7 of 7 assigned items, the action closed 11 days ahead of suspense (case 223) against installation audit requirements.

-

(I): This supported the missile warning mission by freeing manpower for higher-priority actions.

-

(W): I planned and executed the utility privatization review for the Emergency generator vault (record PR-5921), coordinating with the security forces plans office (tracking line 952) and logging results in NexGen IT.

-

(R): As a result, closing 12 of 12 assigned items, all supporting documents were filed and indexed (case 252) against AFCEC reporting requirements.

-

(I): This supported base support operations by removing a documented funding shortfall.

-

(W): I planned and executed the demolition programming action for the Central heat plant (record PR-5958), coordinating with the civil engineer operations flight (tracking line 965) and logging results in the project tracking spreadsheet.

-

(R): As a result, closing 17 of 17 assigned items, the backlog was reduced from 31 items to 4 (case 281) against DoD real property accountability requirements.

-

(I): This supported the launch support mission by eliminating a recurring audit finding.

-

Mission Support

(W): I planned and executed the site activation package for the Fuels facility 2210 (record PR-5995), coordinating with the environmental element (tracking line 101) and logging results in the Accountable Property System of Record.

-

(R): As a result, closing 22 of 22 assigned items, 23 of 23 records were validated (case 310) against FIAR requirements.

-

(I): This supported the installation space control mission by reducing sustainment costs on unneeded infrastructure.

-

(W): I planned and executed the quality assurance surveillance review for the Child development center (record PR-6032), coordinating with the design branch (tracking line 114) and logging results in the real property database.

-

(R): As a result, closing 27 of 27 assigned items, the package was approved without rework (case 339) against DAF records management requirements.

-

(I): This supported homeland defense operations by shortening the project acceptance timeline.

-

(W): I planned and executed the requirements validation for the Security forces annex (record PR-6069), coordinating with the GIS section (tracking line 127) and logging results in the installation GIS layer.

-

(R): As a result, closing 32 of 32 assigned items, record accuracy reached 96 percent (case 368) against installation audit requirements.

-

(I): This supported the missile warning mission by improving the accuracy of the funding request.

-

Overall Supervisor Assessment:

Factor	Categorical Score	Numeric Score	PAQL
Job Achievement and/or Innovation	Very High	110	5
Communication and/or Teamwork	Meets	98	3

Mission Support	Meets	98	3
-----------------	-------	----	---

Job Achievement and/or Innovation

Exceeding expected contributions. The employee completed the Base supply warehouse space utilization survey and closed each record with the facility manager. By DAF scoring standards the recommended PAQL is 5; quality checks found no repeat discrepancies.

Communication and/or Teamwork

Meeting expected contributions. The employee delivered the Hangar 3 apron records reconciliation on schedule alongside the security forces plans office. DAF criteria place this contribution at PAQL 3; deliverables arrived ahead of the stated deadline.

Mission Support

Meeting expected contributions. The employee carried the Dormitory 1245 boundary survey coordination through review with the civil engineer operations flight. Per DAF scoring guidelines this supports a PAQL of 3; audit sampling returned no adverse findings.

Annual Appraisal Assessment for Papa, Linda M Year: 2026

Overall Employee's Self-Assessment:**Job Achievement and/or Innovation**

(W): I planned and executed the cost estimate reconciliation for the Vehicle maintenance shop 848 (record PR-6106), coordinating with the resource advisor (tracking line 140) and logging results in NexGen IT.

-

(R): As a result, closing 37 of 37 assigned items, the submittal was accepted on the first review (case 397) against AFCEC reporting requirements.

-

(I): This supported base support operations by closing a long-standing compliance gap.

-

(W): I planned and executed the sustainment forecast build for the Fire station 2 (record PR-6143), coordinating with the programming section (tracking line 153) and logging results in the project tracking spreadsheet.

-

(R): As a result, closing 42 of 42 assigned items, no discrepancies were identified in follow-up review (case 426) against DoD real property accountability requirements.

-

(I): This supported the launch support mission by freeing manpower for higher-priority actions.

-

(W): I planned and executed the end-to-end disposal action for the Building 1470 annex (record PR-6180), coordinating with the installation JAG office (tracking line 166) and logging results in the Accountable Property System of Record.

-

(R): As a result, closing 6 of 6 assigned items, all 14 assigned actions closed on schedule (case 455) against FIAR requirements.

-

(I): This supported the installation space control mission by removing a documented funding shortfall.

-

Communication and/or Teamwork

(W): I planned and executed the condition assessment for the Water treatment plant 1102 (record PR-6217), coordinating with the contracting squadron (tracking line 179) and logging results in the real property database.

-

(R): As a result, closing 11 of 11 assigned items, all findings were cleared before the deadline (case 484) against DAF records management requirements.

-

(I): This supported homeland defense operations by eliminating a recurring audit finding.

-

(W): I planned and executed the space utilization survey for the Base supply warehouse (record PR-6254), coordinating with the facility manager (tracking line 192) and logging results in the installation GIS layer.

-

(R): As a result, closing 16 of 16 assigned items, the action closed 11 days ahead of suspense (case 513) against installation audit requirements.

-

(I): This supported the missile warning mission by reducing sustainment costs on unneeded infrastructure.

-

(W): I planned and executed the records reconciliation for the Hangar 3 apron (record PR-6291), coordinating with the security forces plans office (tracking line 205) and logging results in NexGen IT.

-

(R): As a result, closing 21 of 21 assigned items, all supporting documents were filed and indexed (case 542) against AFCEC reporting requirements.

-

(I): This supported base support operations by shortening the project acceptance timeline.

-

Mission Support

(W): I planned and executed the boundary survey coordination for the Dormitory 1245 (record PR-6328), coordinating with the civil engineer operations flight (tracking line 218) and logging results in the project tracking spreadsheet.

-

(R): As a result, closing 26 of 26 assigned items, the backlog was reduced from 31 items to 4 (case 571) against DoD real property accountability requirements.

-

(I): This supported the launch support mission by improving the accuracy of the funding request.

-

(W): I planned and executed the capitalization review for the Munitions storage area (record PR-6365), coordinating with the environmental element (tracking line 231) and logging results in the Accountable Property System of Record.

-

(R): As a result, closing 31 of 31 assigned items, 23 of 23 records were validated (case 600) against FIAR requirements.

-

(I): This supported the installation space control mission by closing a long-standing compliance gap.

-

(W): I planned and executed the encroachment resolution for the Ridgeline communications pad (record PR-6402), coordinating with the design branch (tracking line 244) and logging results in the real property database.

-

(R): As a result, closing 36 of 36 assigned items, the package was approved without rework (case 629) against DAF records management requirements.

-

(I): This supported homeland defense operations by freeing manpower for higher-priority actions.

-

(I): This supported the launch support mission by removing a documented funding shortfall.

-

(W): I planned and executed the site activation package for the Fuels facility 2210 (record PR-6735), coordinating with the environmental element (tracking line 361) and logging results in the Accountable Property System of Record.

-

(R): As a result, closing 40 of 40 assigned items, 23 of 23 records were validated (case 890) against FIAR requirements.

-

(I): This supported the installation space control mission by eliminating a recurring audit finding.

-

Overall Supervisor Assessment:

Factor	Categorical Score	Numeric Score	PAQL
Job Achievement and/or Innovation	Meets	68	3

Communication and/or Teamwork	Meets	68	3
Mission Support	Meets	68	3

Job Achievement and/or Innovation

Meeting expected contributions. The employee ran the Munitions storage area capitalization review from intake to closeout with the environmental element. Measured against DAF PAQL guidance the level is 3; assigned actions closed without supervisor intervention.

Communication and/or Teamwork

Meeting expected contributions. The employee finished the Ridgeline communications pad encroachment resolution after reconciling records with the design branch. DAF guidance supports a recommended PAQL of 3; the section met its stated accuracy goal.

Mission Support

Meeting expected contributions. The employee executed the Legacy antenna field easement renewal package and briefed results to the GIS section. Under DAF scoring guidelines a PAQL of 3 applies; revisions were limited to administrative corrections.

Midpoint Appraisal Assessment for Romeo, Angela Year: 2026

Overall Employee's Self-Assessment:**Job Achievement and/or Innovation**

(W): I planned and executed the capitalization review for the Munitions storage area (record PR-7105), coordinating with the environmental element (tracking line 491) and logging results in the Accountable Property System of Record.

-

(R): As a result, closing 8 of 8 assigned items, 23 of 23 records were validated (case 419) against FIAR requirements.

-

(I): This supported the installation space control mission by improving the accuracy of the funding request.

-

(W): I planned and executed the encroachment resolution for the Ridgeline communications pad (record PR-7142), coordinating with the design branch (tracking line 504) and logging results in the real property database.

-

(R): As a result, closing 13 of 13 assigned items, the package was approved without rework (case 448) against DAF records management requirements.

-

(I): This supported homeland defense operations by closing a long-standing compliance gap.

-

Communication and/or Teamwork

(W): I planned and executed the inventory validation for the Utilities corridor 7 (record PR-7216), coordinating with the resource advisor (tracking line 530) and logging results in NexGen IT.

-

(R): As a result, closing 23 of 23 assigned items, the submittal was accepted on the first review (case 506) against AFCEC reporting requirements.

-

(I): This supported base support operations by removing a documented funding shortfall.

-

(W): I planned and executed the acceptance inspection cycle for the North Gate access road (record PR-7253), coordinating with the programming section (tracking line 543) and logging results in the project tracking spreadsheet.

-

(R): As a result, closing 28 of 28 assigned items, no discrepancies were identified in follow-up review (case 535) against DoD real property accountability requirements.

-

(I): This supported the launch support mission by eliminating a recurring audit finding.

-

Mission Support

(W): I planned and executed the audit sampling review for the Airfield lighting vault (record PR-7327), coordinating with the contracting squadron (tracking line 569) and logging results in the real property database.

-

(R): As a result, closing 38 of 38 assigned items, all findings were cleared before the deadline (case 593) against DAF records management requirements.

-

(I): This supported homeland defense operations by shortening the project acceptance timeline.

-

(W): I planned and executed the lease administration action for the Consolidated storage complex (record PR-7364), coordinating with the facility manager (tracking line 582) and logging results in the installation GIS layer.

-

(R): As a result, closing 43 of 43 assigned items, the action closed 11 days ahead of suspense (case 622) against installation audit requirements.

-

(I): This supported the missile warning mission by improving the accuracy of the funding request.

-

Overall Supervisor Assessment:

Factor	Categorical Score	Numeric Score	PAQL
Job Achievement and/or Innovation	Meets	68	3
Communication and/or Teamwork	Meets	68	3
Mission Support	Meets	68	3

Job Achievement and/or Innovation

Meeting expected contributions. The employee carried the Airfield lighting vault audit sampling review through review with the contracting squadron. Referencing DAF scoring criteria, PAQL 3 is recommended; work products required minimal revision.

Communication and/or Teamwork

Meeting expected contributions. The employee ran the Consolidated storage complex lease administration action from intake to closeout with the facility manager. This tracks to a PAQL of 3 under DAF guidance; suspense dates were met without exception.

Mission Support

Meeting expected contributions. The employee finished the Emergency generator vault utility privatization review after reconciling records with the security forces plans office. By DAF scoring standards the recommended PAQL is 3; no rework was returned by the reviewing office.

Job Achievement and/or Innovation:

Objective 1: Coordinate, plan, manage, and execute all aspects of Real Property Accountability based on Federal Laws/Regulations and DoD/DAF policy, safeguarding real property records and ensuring records meet all FIAR requirements within 90% accuracy.

Objective 2: Coordinate, plan, manage, and execute all aspects of Physical Inventory of all real property, inspecting all necessary components and completing inventory sheets for inspected facilities with a 95% accuracy rate.

Communication and/or Teamwork:

Objective 1: Provide oversight of the DD Form 1354 program by reviewing, validating, transferring, and accepting real property records at cost and/or capitalization for all performed projects.

Objective 2: Coordinate, plan, manage, and execute all aspects of In-Grant/Out-Grant Management, reviewing requests and coordinating each action with appropriate offices within DAF.

Mission Support:

Objective 1: Participate in facility final inspections to validate DD Form 1354 data and capitalize new or improved assets, updating the appropriate sections of the Accountable Property System of Record.

Objective 2: Update records for all changes and obtain necessary approvals, negotiating cost-effective terms and executing instruments and boundary surveys 90% on time.

Overall Employee's Self-Assessment:**Job Achievement and/or Innovation**

(W): I planned and executed the demolition programming action for the Central heat plant (record PR-7438), coordinating with the civil engineer operations flight (tracking line 608) and logging results in the project tracking spreadsheet.

-

(R): As a result, closing 12 of 12 assigned items, the backlog was reduced from 31 items to 4 (case 680) against DoD real property accountability requirements.

-

(I): This supported the launch support mission by freeing manpower for higher-priority actions.

-

(W): I planned and executed the site activation package for the Fuels facility 2210 (record PR-7475), coordinating with the environmental element (tracking line 621) and logging results in the Accountable Property System of Record.

-

(R): As a result, closing 17 of 17 assigned items, 23 of 23 records were validated (case 709) against FIAR requirements.

-

(I): This supported the installation space control mission by removing a documented funding shortfall.

-

(W): I planned and executed the quality assurance surveillance review for the Child development center (record PR-7512), coordinating with the design branch (tracking line 634) and logging results in the real property database.

-

(R): As a result, closing 22 of 22 assigned items, the package was approved without rework (case 738) against DAF records management requirements.

-

(I): This supported homeland defense operations by eliminating a recurring audit finding.

Communication and/or Teamwork

(W): I planned and executed the requirements validation for the Security forces annex (record PR-7549), coordinating with the GIS section (tracking line 647) and logging results in the installation GIS layer.

(R): As a result, closing 27 of 27 assigned items, record accuracy reached 96 percent (case 767) against installation audit requirements.

(I): This supported the missile warning mission by reducing sustainment costs on unneeded infrastructure.

(W): I planned and executed the cost estimate reconciliation for the Vehicle maintenance shop 848 (record PR-7586), coordinating with the resource advisor (tracking line 660) and logging results in NexGen IT.

(R): As a result, closing 32 of 32 assigned items, the submittal was accepted on the first review (case 796) against AFCEC reporting requirements.

(I): This supported base support operations by shortening the project acceptance timeline.

(W): I planned and executed the sustainment forecast build for the Fire station 2 (record PR-7623), coordinating with the programming section (tracking line 673) and logging results in the project tracking spreadsheet.

(R): As a result, closing 37 of 37 assigned items, no discrepancies were identified in follow-up review (case 825) against DoD real property accountability requirements.

(I): This supported the launch support mission by improving the accuracy of the funding request.

Mission Support

(W): I planned and executed the end-to-end disposal action for the Building 1470 annex (record PR-7660), coordinating with the installation JAG office (tracking line 686) and logging results in the Accountable Property System of Record.

(R): As a result, closing 42 of 42 assigned items, all 14 assigned actions closed on schedule (case 854) against FIAR requirements.

(I): This supported the installation space control mission by closing a long-standing compliance gap.

(W): I planned and executed the condition assessment for the Water treatment plant 1102 (record PR-7697), coordinating with the contracting squadron (tracking line 699) and logging results in the real property database.

(R): As a result, closing 6 of 6 assigned items, all findings were cleared before the deadline (case 883) against DAF records management requirements.

(I): This supported homeland defense operations by freeing manpower for higher-priority actions.

(W): I planned and executed the space utilization survey for the Base supply warehouse (record PR-7734), coordinating with the facility manager (tracking line 712) and logging results in the installation GIS layer.

(R): As a result, closing 11 of 11 assigned items, the action closed 11 days ahead of suspense (case 912) against installation audit requirements.

(I): This supported the missile warning mission by removing a documented funding shortfall.

Overall Supervisor Assessment:

Factor	Categorical Score	Numeric Score	PAQL
Job Achievement and/or Innovation	Meets	68	3
Communication and/or Teamwork	Meets	68	3
Mission Support	Meets	68	3

Job Achievement and/or Innovation

Meeting expected contributions. The employee executed the Central heat plant demolition programming action and briefed results to the civil engineer operations flight. DAF criteria place this contribution at PAQL 3; documentation was complete at first submission.

Communication and/or Teamwork

Meeting expected contributions. The employee closed the Fuels facility 2210 site activation package while supporting the environmental element. Per DAF scoring guidelines this supports a PAQL of 3; assigned taskings closed inside the required window.

Mission Support

Meeting expected contributions. The employee completed the Child development center quality assurance surveillance review and closed each record with the design branch. Measured against DAF PAQL guidance the level is 3; record accuracy remained above the established threshold.
